The Trust

The Balter Invenomic Fund (the “Fund”) is a series of Northern Lights Fund Trust II, (the “Trust”) a Delaware statutory trust, organized on August 26, 2010.

The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the “Board” or “Trustees”). The Fund may issue an unlimited number of shares of beneficial interest. All shares of the Fund have equal rights and privileges. Each share of the Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Fund are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

The Fund is a diversified series of the Trust. The Fund’s investment objective, restrictions and policies are more fully described here and in the Prospectus. The Board may add classes to and reclassify the shares of the Fund, start other series and offer shares of a new fund under the Trust at any time.

The Fund offers two class of shares: Institutional Class shares and Investor Class shares. Each share class represents an interest in the same assets of the Fund, has the same rights and is identical in all material respects except that (i) each class of shares may be subject to different (or no) sales loads, (ii) each class of shares may bear different (or no) distribution fees; (iii) each class of shares may have different shareholder features, such as minimum investment amounts; (iv) certain other class-specific expenses will be borne solely by the class to which such expenses are attributable, including transfer agent fees attributable to a specific class of shares, printing and postage expenses related to preparing and distributing materials to current shareholders of a specific class, registration fees paid by a specific class of shares, the expenses of administrative personnel and services required to support the shareholders of a specific class, litigation or other legal expenses relating to a class of shares, Trustees’ fees or expenses paid as a result of issues relating to a specific class of shares and accounting fees and expenses relating to a specific class of shares and (v) each class has exclusive voting rights with respect to matters relating to its own distribution arrangements. Each share of the Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Fund is entitled to participate equally with other shares on a class-specific basis (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Funds are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

Under the Trust’s Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the “1940 Act”) and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

Balter Liquid Alternatives, LLC (the “Adviser” or “Balter”) serves as the investment adviser to the Fund.

Invenomic Capital Management, LP (the “Sub-Adviser”) serves as the Fund’s investment sub-adviser.

Investment Policies, Strategies and Associated Risks

The investment objective of the Fund is to seek long term capital. The investment objective of the Fund and the descriptions of the Fund's principal investment strategies are set forth under "Investment Strategies, Related Risks and Disclosure of Portfolio Holdings" in the Prospectus. The Fund's investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Trust, although the Fund will provide shareholders with notice of any change to the Fund's investment objectives at least 60 days prior to such change.

The following pages contain more detailed information about the types of instruments in which the Fund may invest, strategies the Adviser or the Sub-Adviser may employ in pursuit of the Fund's investment objective and a summary of related risks.

Risks Associated with Economic Events

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") significantly revises and expands the rulemaking, supervisory and enforcement authority of federal bank, securities and commodities regulators. It is unclear how these regulators will exercise these revised and expanded powers and whether they will undertake rulemaking, supervisory or enforcement actions that would adversely affect the Fund or investments made by the Fund. Possible regulatory actions taken under these revised and expanded powers may include actions related to financial consumer protection, proprietary trading and derivatives. There is a risk that new and additional government regulation authorized by the Dodd-Frank Act could result in higher Fund costs and expenses. Legislators and regulators in the United States are currently considering a wide range of proposals in addition to the Dodd-Frank Act that, if enacted, could result in major changes to the way banking operations are regulated.

Government Intervention in Financial Markets Risk

Instability in the financial markets may lead the U.S. government and foreign governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that may experience extreme volatility, and in some cases a lack of liquidity. U.S. federal and state governments and foreign governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities in which the Fund invests, or the issuers of such securities, in ways that are unforeseeable. Issuers of corporate securities might seek protection under the bankruptcy laws. Legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objective.

Multi-Manager and Multi-Style Management Risk

Fund performance is dependent upon the success of the Adviser and the Sub-Adviser in implementing the Fund's investment strategies in pursuit of its goal. To a significant extent, the Fund's performance will depend of the success of the Adviser's in selecting and overseeing the Sub-Adviser and on the Sub-Adviser's skill in executing the relevant strategy and selecting investments for the Fund. There can be no assurance that the Adviser or Sub-Adviser will be successful in this regard.

The Adviser's and the Sub-Adviser's judgments about the attractiveness, value and potential appreciation of a particular asset class or individual security in which the Fund invests may prove to be incorrect, and there is no guarantee that the Adviser's or the Sub-Adviser's judgment will produce the desired results. In addition, the Fund may allocate its assets so as to under- or over-emphasize certain strategies or investments under market conditions that are not optimal, in which case the Fund's value may be adversely affected.

Equity Securities

The Fund may invest in equity securities consistent with its investment objective and strategies. Common stocks, preferred stocks and convertible securities are examples of equity securities in which the Fund may invest.

All investments in equity securities are subject to market risks that may cause their prices to fall. Historically, the equity markets have moved in cycles and the value of the securities in the Fund's portfolio may fluctuate substantially from day to day. Owning an equity security can also subject the Fund to the risk that the issuer may discontinue paying dividends. Other risks of investing globally in equity securities may include changes in currency exchange rates, exchange control regulations, expropriation of assets or nationalization, imposition of taxes including withholding taxes on dividend or interest payments, and difficulty in obtaining and enforcing judgments against entities. Equities investments may involve substantial risks and may be subject to wide and sudden fluctuations in market value, with a resulting fluctuation in the amount of profits and losses. There are no absolute restrictions in regard to the size or operating experience of the companies in which the Fund may invest directly or indirectly. In addition, relatively small companies in which the Fund may invest may lack management depth or the ability to generate internally, or obtain externally, the funds necessary for growth and companies with new products or services could sustain significant losses if projected markets do not materialize.

To the extent the Fund invests in the equity securities of small- and medium-sized companies, they will be exposed to the risks of small- and medium-sized companies. Such companies often have narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies. Furthermore, those companies often have limited product lines, or services, markets, or financial resources, or are dependent on a small management group. In addition, because these stocks are not well-known to the investing public, do not have significant institutional ownership, and are followed by relatively few security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether based on fundamental analysis, can decrease the value and liquidity of securities held by the Fund. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund's portfolio.

Common Stock

A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company's business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which the Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to the Fund as a holder of common stock. It is possible that all assets of that company will be exhausted before any payments are made to the Fund.

Preferred Stock

Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets. A preferred stock has a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

Rights and Warrants

The Fund may invest in rights or warrants. Rights and warrants entitle the holder to buy equity securities at a specific price for a specific period of time. Rights and warrants may be considered more speculative than certain other types of investments in that they do not entitle a holder to dividends or voting rights with respect to the underlying securities that may be purchased nor do they represent any rights in the assets of the issuing company. Also, the value of a right or warrant does not necessarily change with the value of the underlying securities and a right or warrant ceases to have value if it is not exercised prior to the expiration date.

Convertible Securities

The Fund invests in convertible securities. Convertible securities (such as debt securities or preferred stock) may be converted into or exchanged for a prescribed amount of common stock of the same or different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or dividends paid on preferred stock until the convertible stock matures or is redeemed, converted or exchanged. While no securities investment is without some risk, investments in convertible securities generally entail less risk than the issuer's common stock. However, the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security. In addition to the general risk associated with equity securities discussed above, the market value of convertible securities is also affected by prevailing interest rates, the credit quality of the issuer and any call provisions. While convertible securities generally offer lower interest or dividend yields than nonconvertible debt securities of similar quality, they do enable the investor to benefit from any increases in the market price of the underlying common stock.

Foreign Securities

The Fund may invest in foreign securities American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), International Depositary Receipts ("IDRs"), Global Depositary Receipts ("GDRs") and foreign equity securities. The Fund may invest without limit in U.S. dollar denominated foreign securities and depositary receipts, and may invest up to 25% of its total assets in equity securities of foreign issuers that are not traded in the U.S. In determining whether a company is foreign, the Adviser or Sub-Adviser will consider various factors including where the company is headquartered, where the company's principal operations are located, where the company's revenues are derived, where the principal trading market is located and the country in which the company is legally organized. The weight given to each of these factors will vary depending upon the circumstances. Investments in foreign securities may involve a greater degree of risk than those in domestic securities.

American Depositary Receipts, European Depositary Receipts, International Depositary Receipts and Global Depositary Receipts

The Fund may invest in securities of foreign issuers in the form of "ADRs, "EDRs", "IDRs" and "GDRs". These securities may not necessarily be denominated in the same currency as the securities for which they may be exchanged. These are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar financial institution. Designed for use in U.S. securities markets, ADRs are alternatives to the purchase of the underlying securities in their national market and currencies, while IDRs and GDRs are international and global receipts evidencing a similar arrangement. ADRs, EDRs, IDRs and GDRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depositary, whereas a depositary may establish an unsponsored facility without participation by the issuer of the depositary security. Holders of unsponsored depositary receipts generally bear all the costs of such facilities and the depositary of an

unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts of the deposited securities.

Investing in foreign securities involves certain risks not ordinarily associated with investments in securities of domestic issuers. Foreign securities markets have, for the most part, substantially less volume than the U.S. markets and securities of many foreign companies are generally less liquid and their prices more volatile than securities of U.S. companies. There is generally less government supervision and regulation of foreign exchanges, brokers and issuers than in the United States. The rights of investors in certain foreign countries may be more limited than those of shareholders of U.S. issuers and the Fund may have greater difficulty taking appropriate legal action to enforce its rights in a foreign court than in a U.S. court. Investing in foreign securities also involves risks associated with government, economic, monetary, and fiscal policies (such as the adoption of protectionist trade measures), possible foreign withholding taxes on dividends and interest payable to the Fund, possible taxes on trading profits, inflation, and interest rates, economic expansion or contraction, and global or regional political, economic or banking crises. Furthermore, there is the risk of possible seizure, nationalization or expropriation of the foreign issuer or foreign deposits and the possible adoption of foreign government restrictions such as exchange controls. Also, foreign issuers are not necessarily subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to domestic issuers and as a result, there may be less publicly available information on such foreign issuers than is available from a domestic issuer.

In addition, the Fund may invest in foreign securities of companies that are located in developing or emerging markets. Investing in securities of issuers located in these markets may pose greater risks not typically associated with investing in more established markets such as increased risk of social, political and economic instability. Emerging market countries typically have smaller securities markets than developed countries and therefore less liquidity and greater price volatility than more developed markets. Securities traded in emerging markets may also be subject to risks associated with the lack of modern technology, poor infrastructures, the lack of capital base to expand business operations and the inexperience of financial intermediaries, custodians and transfer agents. Emerging market countries are also more likely to impose restrictions on the repatriation of an investor's assets and even where there is no outright restriction on repatriation, the mechanics of repatriations may delay or impede the Fund's ability to obtain possession of its assets. As a result, there may be an increased risk or price volatility associated with the Fund's investments in emerging market countries, which may be magnified by currency fluctuations.

Dividends and interest payable on the Fund's foreign securities may be subject to foreign withholding tax. The Fund may also be subject to foreign taxes on its trading profits. Some countries may also impose a transfer or stamp duty on certain securities transactions. The imposition of these taxes will increase the cost to the Fund of investing in those countries that impose these taxes. To the extent that, as anticipated, such taxes are not offset by credits or deductions available to shareholders in the Fund under U.S. tax law, they will reduce the net return to the Fund's shareholders. It is not anticipated that the Fund will be eligible to pass through to shareholders a federal tax credit or federal tax deduction related to any foreign taxes borne by the Fund.

To the extent the Fund invests in securities denominated in foreign currencies, the Fund will be subject to the risk that a change in the value of any such currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of the Fund's assets denominated in that currency. Investing in foreign denominated securities may also result in transaction costs incurred in connection with conversions between various currencies. In addition, only a limited market currently exists for hedging transactions relating to currencies in certain emerging markets and securities transactions undertaken in foreign markets may not be settled promptly, subjecting the Fund to the risk of fluctuating currency exchange rates pending settlement.

Other Investment Companies

The Fund may invest in shares of other registered investment companies, including money market mutual funds, in accordance with the limitations established under the 1940 Act. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, the Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear the Fund's proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses Fund shareholders directly bear in connection with the Fund's own operations.

The Fund currently intends to limit its investments in securities issued by other investment companies so that not more than 3% of the outstanding voting stock of any one investment company (other than money market funds) will be owned by the Fund, or its affiliated persons, as a whole. In addition to the advisory and operational fees the Fund bears directly in connection with its own operation, the Fund would also bear its pro rata portions of each other investment company's advisory and operational expenses.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies. The acquisition of shares by the Fund in other registered investment companies is therefore subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by Rule and/or an exemptive order obtained by the other registered investment companies that permits the Fund to invest in the other registered investment companies beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the Fund enter into an agreement with the other registered investment companies regarding the terms of the investment.

In accordance with Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act, the provisions of Section 12(d)(1) shall not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price including a sales load that exceeds the limits set forth in Rule 2341 of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to a fund of funds (*i.e.*, 8.5%).

Exchange-Traded Funds

The Fund may invest in Exchange-Traded Funds ("ETFs"). ETFs are typically open-end investment companies that are bought and sold on a national securities exchange. An ETF is similar to a traditional mutual fund, but trades at different prices during the day on a security exchange like a stock. Similar to investments in other investment companies discussed above, the Fund's investments in ETFs will involve duplication of advisory fees and other expenses since the Fund will be investing in another investment company. In addition, the Fund's investment in ETFs is also subject to its limitations on investments in investment companies discussed above, absent another applicable exemption. To the extent the Fund invests in ETFs which focus on a particular market segment or industry, the Fund will also be subject to the risks associated with investing in those sectors or industries. The shares of the ETFs in which the Fund will invest will be listed on a national securities exchange and the Fund will purchase or sell these shares on the secondary market at its current market price, which may be more or less than its net asset value per share ("NAV"). Investors in the Fund should be aware that ETFs are subject to "tracking risk," which is the risk that an ETF will not be able to replicate exactly the performance of the index it tracks.

As a purchaser of ETF shares on the secondary market, the Fund will be subject to the market risk associated with owning any security whose value is based on market price. ETF shares historically have

tended to trade at or near their NAV, but there is no guarantee that they will continue to do so. Unlike traditional mutual funds, shares of an ETF may be purchased and redeemed directly from the ETFs only in large blocks (typically, 50,000 shares or more) and only through participating organizations that have entered into contractual agreements with the ETF. The Fund does not expect to enter into such agreements and therefore will not be able to purchase and redeem its ETF shares directly from the ETF.

The Fund may invest in “Short ETFs” which seek a return similar to the inverse, or a multiple of the inverse, of a reference index. Short ETFs carry additional risks because their underlying assets may include a variety of financial instruments, including futures and options on futures, options on securities and securities indices, swap agreements and forward contracts, and may engage in short sales. An ETF’s losses on short sales are potentially unlimited; however, the Fund’s risk would be limited to the amount it invested in the ETF.

Money Market Mutual Funds

The Fund may invest in money market mutual funds in connection with its management of daily cash positions or for temporary defensive purposes. Money market mutual funds are regulated investment companies under the 1940 Act and the Fund will invest in money market funds in accordance with applicable rules and regulations with respect to investments in other investment companies. Please note that in addition to the advisory and operational fees the Fund pays in connection with its own operations, to the extent the Fund invests in money market funds, the Fund will also bear its pro rata portion of each such money market fund’s fees and expenses.

Illiquid Securities

The Fund may not invest more than 15% of the value of its net assets in illiquid securities. The Adviser or the Sub-Adviser will monitor the amount of illiquid securities in the Fund’s portfolio, under the supervision of the Board, to ensure compliance with this investment restriction.

Historically, illiquid securities have included securities subject to contractual or legal restrictions on resale because they have not been registered under the Securities Act of 1933, as amended (the “Securities Act”), securities which are otherwise not readily marketable and repurchase agreements having a maturity of longer than seven days. Mutual funds do not typically hold a significant amount of these restricted or other illiquid securities because of the potential for delays on resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio securities, and the Fund might be unable to sell illiquid securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requests within seven days.

Restricted Securities

The Fund may invest in securities that are subject to restrictions on resale because they have not been registered under the Securities Act. These securities are sometimes referred to as private placements. Although securities which may be resold only to “qualified institutional buyers” in accordance with the provisions of Rule 144A under the Securities Act are technically considered “restricted securities,” the Fund may purchase Rule 144A securities without regard to the limitation on investments in illiquid securities described above in the “Illiquid Securities” section, provided that a determination is made that such securities have a readily available trading market. The Fund may also purchase certain commercial paper issued in reliance on the exemption from regulations in Section 4(2) of the Securities Act (“4(2) Paper”). The Adviser or the Sub-Adviser will determine the liquidity of Rule 144A securities and 4(2) Paper under the supervision of the Board. The liquidity of Rule 144A securities and 4(2) Paper will be monitored by the Adviser, and if as a result of changed conditions it is determined that a Rule 144A security or 4(2) Paper is no longer liquid, the Fund’s holdings of illiquid securities will be reviewed to determine what, if any, action

is required to assure that the Fund does not exceed its applicable percentage limitation for investments in illiquid securities.

Limitations on the resale of restricted securities may have an adverse effect on the marketability of portfolio securities and the Fund might be unable to dispose of restricted securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requirements. The Fund might also have to register such restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

Short Sales

The Fund may engage in short sales of securities, provided the securities are fully listed on a national securities exchange. In a short sale, the Fund sells a security it does not own, in anticipation of a decline in the market value of the security. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing it at the market price at the time of replacement. This price may be more or less than the price at which the security was sold by the Fund. The Fund will incur a loss on a short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The amount of the Fund's loss on a short sale is potentially unlimited. The Fund will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with the short sale.

Typically, the Fund will segregate liquid assets, which are marked-to-market daily, equal to the difference between (a) the market value of the securities sold short at the time they were sold short and (b) the value of the collateral deposited with the broker in connection with the short sale (not including the proceeds from the short sale). While the short position is open, the Fund must maintain segregated assets at such a level that the amount segregated plus the amount deposited with the broker as collateral equal the current market value of the securities sold short.

The dollar amount of short sales at any one time (not including short sales against the box) may not exceed 95% of the net assets of the Fund, and it is expected that normally the dollar amount of such sales will not exceed 75% of the net assets of the Fund.

Fixed Income Securities

General

The Fund may invest in fixed income securities. Examples of such securities are described below.

Corporate Debt Securities

The Fund may invest in fixed-income securities of any maturity, including fixed income securities rated below investment grade by one or more statistical ratings organizations such as Standard & Poor's Ratings Group ("S&P") or Moody's Investors Service, Inc. ("Moody's"). Bonds rated below BBB by S&P or Baa by Moody's, commonly referred to as "junk bonds," typically carry higher coupon rates than investment grade bonds, but also are described as speculative by both S&P and Moody's and may be subject to greater market price fluctuations, less liquidity and greater risk of income or principal including greater possibility of default and bankruptcy of the issuer of such securities than more highly rated bonds. Lower-rated bonds also are more likely to be sensitive to adverse economic or company developments and more subject to price fluctuations in response to changes in interest rates. The market for lower-rated debt issues generally is thinner and less active than that for higher quality securities, which may

limit the Fund's ability to sell such securities at fair value in response to changes in the economy or financial markets. During periods of economic downturn or rising interest rates, highly leveraged issuers of lower-rated securities may experience financial stress which could adversely affect their ability to make payments of interest and principal and increase the possibility of default.

Ratings of debt securities represent the rating agencies' opinions regarding their quality, are not a guarantee of quality and may be reduced after the Fund has acquired the security. If a security's rating is reduced while it is held by the Fund, the Adviser or the Sub-Adviser will consider whether the Fund should continue to hold the security but is not required to dispose of it. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. Also, rating agencies may fail to make timely changes in credit ratings in response to subsequent events, so that an issuer's current financial conditions may be better or worse than the rating indicates. The ratings for corporate debt securities are described in Appendix A.

Lower-Rated Debt Securities

The Fund may invest up to 20% of its net assets in lower-rated debt securities, commonly referred to as "junk bonds" (those rated below the fourth highest grade by a nationally recognized statistical ratings organization ("NRSRO") and non-rated securities judged by the Adviser or the Sub-Adviser to be of equivalent quality), that have poor protection with respect to the payment of interest and repayment of principal, or that may be in default. These securities are often considered to be speculative and involve greater risk of loss or price changes due to changes in the issuer's capacity to pay. The market prices of lower-rated debt securities may fluctuate more than those of higher-rated debt securities and may decline significantly in periods of general economic difficulty, which may follow periods of rising interest rates.

The market for lower-rated debt securities may be thinner and less active than that for higher-rated debt securities, which can adversely affect the prices at which the former are sold. If market quotations are not available, lower-rated debt securities will be valued in accordance with procedures established by the Board, including the use of outside pricing services. Judgment plays a greater role in valuing high-yield corporate debt securities than is the case for securities for which more external sources for quotations and last-sale information are available. Adverse publicity and changing investor perceptions may affect the ability of outside pricing services to value lower-rated debt securities and the Fund's ability to sell these securities.

Since the risk of default is higher for lower-rated debt securities, the Adviser's or the Sub-Adviser's research and credit analysis are an especially important part of managing securities of this type held by the Fund. In considering investments for the Fund, the Adviser or the Sub-Adviser will attempt to identify those issuers of high-yielding debt securities whose financial condition are adequate to meet future obligations, have improved, or is expected to improve in the future. The analysis focuses on relative values based on such factors as interest or dividend coverage, asset coverage, earnings prospects, and the experience and managerial strength of the issuer.

The Fund may choose, at its expense or in conjunction with others, to pursue litigation or otherwise exercise its right as security holder to seek to protect the interests of security holders if it determines this to be in the best interest of the Fund's shareholders.

U.S. Government Obligations and Related Securities

U.S. Government obligations include a variety of securities that are issued or guaranteed by the U.S. Treasury, by various agencies of the U.S. Government or by various instrumentalities that have been established or sponsored by the U.S. Government. U.S. Treasury securities and securities issued by the Government National Mortgage Association ("GNMA") and Small Business Administration are backed

by the “full faith and credit” of the U.S. Government. Other U.S. Government obligations may or may not be backed by the “full faith and credit” of the U.S. Government. In the case of securities not backed by the “full faith and credit” of the U.S. Government, the investor must look principally to the agency issuing or guaranteeing the obligation (such as the Federal Farm Credit System, Fannie Mae and Freddie Mac) for ultimate repayment and may not be able to assert a claim against the U.S. Government itself if the agency or instrumentality does not meet its commitments.

Asset-Backed Securities

Asset-backed securities include pools of mortgages, loans, receivables or other assets. Payment of principal and interest may be largely dependent upon the cash flows generated by the assets backing the securities, and, in certain cases, supported by letters of credit, surety bonds, or other credit enhancements. The value of asset-backed securities may also be affected by the creditworthiness of the servicing agent for the pool, the originator of the loans or receivables, or the financial institution(s) providing the credit support.

Variable or Floating Rate Securities

Variable or floating rate securities provide for periodic adjustments of the interest rate paid. Variable rate securities provide for a specific periodic adjustment in the interest rate, while floating rate securities have interest rates that change whenever there is a change in a designated benchmark rate. Some variable or floating rate securities have put features.

Indexed Securities

The Fund may purchase securities whose prices are indexed to the prices of other securities, securities indices, currencies, precious metals or other commodities, or other financial indicators. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic. Gold-indexed securities, for example, typically provide for a maturity value that depends on the price of gold, resulting in a security whose price tends to rise and fall together with gold prices. Currency-indexed securities typically are short-term to intermediate-term debt securities whose maturity values or interest rates are determined by reference to the values of one or more specified foreign currencies, and may offer higher yields than U.S. dollar-denominated securities of equivalent issuers. Currency-indexed securities may be positively or negatively indexed; that is, their maturity value may increase when the specified currency value increases, resulting in a security that performs similarly to a foreign-denominated instrument, or their maturity value may decline when foreign currencies increase, resulting in a security whose price characteristics are similar to a put on the underlying currency. Currency-indexed securities may also have prices that depend on the value of a number of different foreign currencies relative to each other.

The performance of indexed securities depends to a great extent on the performance of the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the United States and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Recent issuers of indexed securities have included banks, corporations, and certain U.S. government agencies. Indexed securities may be more volatile than the underlying instruments.

Stripped Securities

The Fund may purchase separately traded interest and principal component parts of such obligations that are transferable through the Federal book entry system, known as Separately Traded Registered Interest and Principal Securities (“STRIPS”) and Coupon Under Book Entry Safekeeping (“CUBES”). These instruments are issued by banks and brokerage firms and are created by depositing U.S.

Treasury notes and U.S. Treasury bonds into a special account at a custodian bank; the custodian holds the interest and principal payments for the benefit of the registered owner of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. Receipts include Treasury Receipts (“TRs”), Treasury Investment Growth Receipts (“TIGRs”) and Certificates of Accrual on Treasury Securities (“CATS”).

STRIPS, CUBES, TRs, TIGRs and CATS are sold as zero coupon securities, which mean that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. This discount is amortized over the life of the security, and such amortization will constitute the income earned on the security for both accounting and tax purposes. Because of these features, these securities may be subject to greater interest rate volatility than interest-paying U.S. Treasury obligations. Bonds issued by the Resolution Funding Corporation (“REFCORP”) can also be stripped in this fashion. REFCORP Strips are eligible investments for the Fund.

Zero Coupon Bonds

The Fund may purchase zero coupon bonds. Zero coupon bonds are purchased at a discount from the face amount because the buyer receives only the right to receive a fixed payment on a certain date in the future and does not receive any periodic interest payments. The effect of owning instruments which do not make current interest payments is that a fixed yield is earned not only on the original investment but also, in effect, on all discount accretion during the life of the obligations. This implicit reinvestment of earnings at the same rate eliminates the risk of being unable to reinvest distributions at a rate as high as the implicit yields on the zero coupon bond, but at the same time eliminates the holder’s ability to reinvest at higher rates in the future. For this reason, zero coupon bonds are subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities which pay interest currently, whose fluctuation increases the longer the period of maturity. Although zero coupon bonds do not pay interest to holders prior to maturity, U.S. federal income tax law requires the Fund to recognize as interest income a portion of the bond’s discount each year and this income must then be distributed to shareholders along with other income earned by the Fund. To the extent that any shareholders in the Fund elect to receive their dividends in cash rather than reinvest such dividends in additional shares, cash to make these distributions will have to be provided from the assets of the Fund or other sources such as proceeds of sales of Fund shares and/or sales of portfolio securities. In such cases, the Fund will not be able to purchase additional income producing securities with cash used to make such distributions and its current income may ultimately be reduced as a result.

Real Estate-Related Investments

Real estate-related instruments include real estate investment trusts, commercial and residential mortgage-backed securities, and real estate financings. Real estate-related instruments are sensitive to factors such as real estate values, property taxes, interest rates, cash flow of underlying real estate assets, overbuilding, and the management skill and creditworthiness of the issuer. Real estate-related instruments may also be affected by tax and regulatory requirements, such as those relating to the environment.

Initial Public Offerings

The Fund may purchase shares in initial public offerings (“IPOs”). Because IPO shares frequently are volatile in price, the Fund may hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s portfolio and may lead to increased expenses to the Fund, such as brokerage commissions and transaction costs. By selling shares, the Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Investing in IPOs increases risk because IPO shares are frequently volatile in price. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio.

Borrowing

The Fund may borrow money for investment purposes. The Fund's Investment Restriction regarding borrowing will be interpreted to permit the Fund to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act.

The Fund may borrow money in amounts of up to one-third of its total assets (including the amount borrowed) from banks. In addition, the Fund is authorized to borrow money from time to time for temporary, extraordinary or emergency purposes or for clearance of transactions. The use of borrowing by the Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of the Fund's assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund's agreement with its lender, the NAV per share of the Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Fund did not borrow funds. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

The 1940 Act permits a portfolio to borrow money in amounts of up to one-third of the Fund's total assets from banks for any purpose, and to borrow up to 5% of the Fund's total assets from banks or other lenders for temporary purposes. To limit the risks attendant to borrowing, the 1940 Act requires the Fund to maintain at all times an "asset coverage" of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Fund's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Borrowing money to increase the Fund's investment portfolio is known as "leveraging." Borrowing, especially when used for leverage, may cause the value of the Fund's shares to be more volatile than if the Fund did not borrow. This is because borrowing tends to magnify the effect of any increase or decrease in the value of the Fund's portfolio holdings. Borrowed money thus creates an opportunity for greater gains, but also greater losses. To repay borrowings, the Fund may have to sell securities at a time and at a price that is unfavorable to the Fund. There also are costs associated with borrowing money, and these costs would offset and could eliminate the Fund's net investment income in any given period. Currently, the Fund does not contemplate borrowing money for investment purposes. The Fund's Investment Restriction regarding borrowing will be interpreted to permit the Fund to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act. Reverse repurchase agreements may be considered to be a type of borrowing. Short-term credits necessary for the settlement of securities transactions and arrangements with respect to securities lending will not be considered to be borrowings under the policy. Practices and investments that may involve leverage but are not considered to be borrowings are not subject to the policy. Such trading practices may include futures, options on futures, forward contracts and other derivative investments.

Issuance of Senior Securities

Generally, issuing senior securities is prohibited under the 1940 Act; however, certain exceptions apply such as in the case of borrowing and certain other leveraging transactions. With respect to the Fund's fundamental investment restriction relating to issuing senior securities, "senior securities" are defined as fund obligations that have a priority over the Fund's shares with respect to the payment of dividends or the distribution of fund assets. The 1940 Act prohibits the Fund from issuing senior securities except that the Fund may borrow money in amounts of up to one-third of the Fund's total assets from banks for any purpose as discussed above. The Fund also may borrow up to 5% of the Fund's total assets from banks or other lenders for temporary purposes, and these borrowings are not considered senior securities. The

issuance of senior securities by the Fund can increase the speculative character of the Fund's outstanding shares through leveraging. Leveraging of the Fund's portfolio through the issuance of senior securities magnifies the potential for gain or loss on monies, because even though the Fund's net assets remain the same, the total risk to investors is increased. Certain widely used investment practices that involve a commitment by the Fund to deliver money or securities in the future are not considered by the SEC to be senior securities, provided that the Fund segregates cash or liquid securities in an amount necessary to pay the obligation or the Fund holds an offsetting commitment from another party. These investment practices include repurchase and reverse repurchase agreements, swaps, dollar rolls, options, futures and forward contracts. The Fund's policy will be interpreted not to prevent collateral arrangements with respect to swaps, options, forward or futures contracts or other derivatives, or the posting of initial or variation margin.

Options, Futures and Other Derivative Strategies

General

The Fund may invest in futures, forwards, options, spot contracts and swaps on commodities, financial indices and instruments, currencies and interest rates (collectively, "Financial Instruments"). The use of such Financial Instruments is subject to applicable regulations of the SEC, the several exchanges upon which they are traded and the Commodity Futures Trading Commission ("CFTC"). In addition, the Fund's ability to use Financial Instruments will be limited by tax considerations.

In addition to the instruments, strategies and risks described below and in the Prospectus, the Adviser or the Sub-Adviser may discover additional opportunities in connection with Financial Instruments and other similar or related techniques. These new opportunities may become available as the Adviser or the Sub-Adviser develops new techniques, as regulatory authorities broaden the range of permitted transactions and as new Financial Instruments or other techniques are developed. The Adviser or the Sub-Adviser may utilize these opportunities to the extent that they are consistent with the Fund's investment objectives and permitted by the Fund's investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

The use of Financial Instruments involves special considerations and risks which include, but are not limited to, the following:

- (1) Successful use of most Financial Instruments depends upon the Adviser's or the Sub-Adviser's ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of stock market trends by the Adviser or the Sub-Adviser may still not result in a successful transaction. The Adviser or the Sub-Adviser may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.
- (2) The prices of Financial Instruments can diverge from the prices of their underlying instruments and may be affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from imposition of daily price fluctuation limits or trading halts.

- (3) As described below, the Fund might be required to maintain assets as “cover,” maintain segregated accounts or make margin payments when it takes positions in Financial Instruments involving obligations to third parties (*e.g.*, Financial Instruments other than purchased options). If the Fund were unable to close out its positions in such Financial Instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair the Fund’s ability to sell a portfolio security or make an investment when it would otherwise be favorable to do so or require that the Fund sell a portfolio security at a disadvantageous time. The Fund’s ability to close out a position in a Financial Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the “counter-party”) to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

The Fund will not enter into any transactions using Financial Instruments (except for purchased options) unless it owns either (1) an offsetting (“covered”) position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian in the prescribed amount as determined daily.

Assets used as cover or held in an account cannot be sold while the position in the corresponding Financial Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of the Fund’s assets to cover or held in accounts could impede portfolio management or the Fund’s ability to meet redemption requests or other current obligations. Losses may arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by the Fund on options transactions.

Options

A call option gives the purchaser the right to buy, and obligates the writer to sell, the underlying investment at the agreed-upon price during the option period. A put option gives the purchaser the right to sell, and obligates the writer to buy, the underlying investment at the agreed-upon price during the option period. Purchasers of options pay an amount, known as a premium, to the option writer in exchange for the right under the option contract.

The purchase of call options can serve as a long hedge, and the purchase of put options can serve as a short hedge. Writing put or call options can enable the Fund to enhance income or yield by reason of the premiums paid by the purchasers of such options. However, the Fund may also suffer a loss as the result of writing options. For example, if the market price of the security underlying a put option declines to less than the exercise price of the option, minus the premium received, the Fund would suffer a loss.

Writing call options can serve as a limited short hedge, because declines in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security appreciates to a price higher than the exercise price of the call option, it can be expected that the option will be exercised and the Fund will be obligated to sell the security at less than its market value. If the call option is an over-the-counter (OTC) option, the securities or other assets used as cover may be considered illiquid.

Writing put options can serve as a limited long hedge because increases in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security depreciates to a price lower than the exercise price of the put option, it can be expected that the

put option will be exercised and the Fund will be obligated to purchase the security or at more than its market value. If the put option is an OTC option, the securities or other assets used as cover may be considered illiquid.

The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment, the historical price volatility of the underlying investment and general market conditions. The exercise price of the options may be below, equal to or above the current market value of the underlying security or other instrument. Options that expire unexercised have no value, and the Fund will realize a loss in the amount of the premium paid and any transaction costs.

The Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, the Fund may terminate its obligation under a call or put option that it had written by purchasing an identical call or put option; this is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option; this is known as a closing sale transaction. Closing transactions permit the Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Risks of Options on Securities. Options offer large amounts of leverage, which will result in the Fund's net asset value being more sensitive to changes in the value of the related instrument. The Fund may purchase or write both exchange-traded and OTC options. Exchange-traded options in the United States are issued by a clearing organization affiliated with the exchange on which the option is listed that, in effect, guarantees completion of every exchange-traded option transaction. In contrast, OTC options are contracts between the Fund and its counterparty (usually a securities dealer or a bank) with no clearing organization guarantee. Thus, when the Fund purchases an OTC option, it relies on the counterparty from whom it purchased the option to make or take delivery of the underlying investment upon exercise of the option. Failure by the counterparty to do so would result in the loss of any premium paid by the Fund as well as the loss of any expected benefit of the transaction.

The Fund's ability to establish and close out positions in exchange-listed options depends on the existence of a liquid market. However, there can be no assurance that such a market will exist at any particular time. Closing transactions can be made for OTC options only by negotiating directly with the counterparty, or by a transaction in the secondary market if any such market exists. There can be no assurance that the Fund will in fact be able to close out an OTC option position at a favorable price prior to expiration. In the event of insolvency of the counterparty, the Fund might be unable to close out an OTC option position at any time prior to its expiration, if at all.

If the Fund were unable to effect a closing transaction for an option it had purchased, due to the absence of a secondary market, the imposition of price limits or otherwise, it would have to exercise the option to realize any profit. The inability to enter into a closing transaction for a covered call option written by the Fund could leave the Fund unable to prevent material losses because the Fund would be unable to sell the investment used as cover for the written option until the option expires or is exercised.

OTC Options. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type of arrangement allows the Fund great flexibility to tailor the option to its needs, OTC options generally involve greater risk than exchange-traded options, which are guaranteed by the

clearing organization of the exchanges where they are traded. Assets used as cover for OTC options may be considered illiquid.

Options on Indices. Puts and calls on indices are similar to puts and calls on securities except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities. When the Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple (“multiplier”), which determines the total dollar value for each point of such difference. When the Fund buys a call on an index, it pays a premium and has the same rights as to such call as are indicated above. When the Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund’s exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When the Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and exercise price times the multiplier if the closing level is less than the exercise price.

Risks of Options on Indices. The risks of investment in options on indices may be greater than options on securities. Because index options are settled in cash, when the Fund writes a call on an index it cannot provide in advance for its potential settlement obligations by acquiring and holding the underlying securities. The Fund can offset some of the risk of writing a call index option by holding a diversified portfolio of securities similar to those on which the underlying index is based. However, the Fund cannot, as a practical matter, acquire and hold a portfolio containing exactly the same securities as underlie the index and, as a result, bears a risk that the value of the securities held will vary from the value of the index.

Even if the Fund could assemble a portfolio that exactly reproduced the composition of the underlying index, it still would not be fully covered from a risk standpoint because of the “timing risk” inherent in writing index options. When an index option is exercised, the amount of cash that the holder is entitled to receive is determined by the difference between the exercise price and the closing index level on the date when the option is exercised. As with other kinds of options, the Fund as the call writer will not learn that the Fund has been assigned until the next business day at the earliest. The time lag between exercise and notice of assignment poses no risk for the writer of a covered call on a specific underlying security, such as common stock, because there the writer’s obligation is to deliver the underlying security, not to pay its value as of a fixed time in the past. So long as the writer already owns the underlying security, it can satisfy its settlement obligations by simply delivering it, and the risk that its value may have declined since the exercise date is borne by the exercising holder. In contrast, even if the writer of an index call holds securities that exactly match the composition of the underlying index, it will not be able to satisfy its assignment obligations by delivering those securities against payment of the exercise price. Instead, it will be required to pay cash in an amount based on the closing index value on the exercise date. By the time it learns that it has been assigned, the index may have declined, with a corresponding decline in the value of its portfolio. This “timing risk” is an inherent limitation on the ability of index call writers to cover their risk exposure by holding securities positions.

If the Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, the Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

Futures and Options on Futures

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific underlying reference instrument at a specified future time at a specified price.

An option on a futures contract is the right, purchased for a certain price, to either buy or sell the underlying futures contract during a certain period of time for a fixed price. Options trading requires many of the same skills as does successful futures contract trading. However, since specific market movements of the underlying futures contract must be predicted accurately, the risks involved are somewhat different. For example, if the Fund buys an option (either to sell or buy a futures contract), the Fund will pay a “premium” representing the market value of the option. Unless the price of the futures contract underlying the option changes and it becomes profitable to exercise or offset the option before it expires, the Fund may lose the entire amount of the premium. Conversely, if the Fund sells an option (either to sell or buy a futures contract), the Fund will be credited with the premium but will have to deposit margin due to the Fund’s contingent liability to take or make delivery of the underlying futures contract in the event the option is exercised. The writing of an option involves the risk of losing the entire investment or substantially more than the entire investment, thereby causing significant losses to the client in a relatively short period of time. The ability to trade in or exercise options may be restricted in the event that trading in the underlying futures contract becomes restricted.

An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made; generally contracts are closed out prior to their expiration date.

There are risks associated with these activities, including the following: (1) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or lack of correlation between the changes in market value of the securities held and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures.

Swaps

Credit Default Swaps. The Fund may enter into credit default swap agreements. The credit default swap agreement may have as a reference obligation one or more securities that are not currently held by the Fund. The buyer in a credit default swap agreement is obligated to pay the seller a periodic fee, typically expressed in basis points on the principal amount of the underlying obligation (the “notional” amount), over the term of the agreement in return for a contingent payment upon the occurrence of a credit event with respect to the underlying reference obligation. A credit event is typically a default, restructuring or bankruptcy.

The Fund may be either the buyer or seller in the transaction. As a seller, the Fund receives a fixed rate of income throughout the term of the agreement, which typically is between one month and five years, provided that no credit event occurs. If a credit event occurs, the Fund typically must pay the contingent payment to the buyer, which is typically the par value (full notional value) of the reference obligation. The contingent payment may be a cash settlement or by physical delivery of the reference obligation in return for payment of the face amount of the obligation. If the Fund is a buyer and no credit

event occurs, the Fund may lose its investment and recover nothing. However, if a credit event occurs, the buyer typically receives full notional value for a reference obligation that may have little or no value.

Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly. Credit default swaps are subject to general market risk, liquidity risk and credit risk. If the Fund is a buyer in a credit default swap agreement and no credit event occurs, then it will lose its investment. In addition, the value of the reference obligation received by the Fund as a seller if a credit event occurs, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund.

The Fund may also invest in credit default swap index products and in options on credit default swap index products. The individual credits underlying these credit default swap indices may be rated investment grade or non-investment grade. These instruments are designed to track representative segments of the credit default swap market and provide investors with exposure to specific “baskets” of issuers of bonds or loans. Such investments are subject to liquidity risks as well as other risks associated with investments in credit default swaps discussed above. The Fund reserves the right to invest in similar instruments that may become available in the future.

Forward Trading. The Fund may trade forward contracts. Forward contracts are not traded on exchanges and are not standardized; rather, banks and dealers act as principals in these markets negotiating each transaction on an individual basis. Neither the CFTC nor any banking authority regulates trading in forward contracts. In addition, there is no limitation on the daily price movements of forward contracts. Principals in the forward markets have no obligation to continue to make markets in the forward contracts traded. There have been periods during which certain banks or dealers have refused to quote prices for forward contracts or have quoted prices with an unusually wide spread between the price at which they are prepared to buy and that at which they are prepared to sell. Disruptions can occur in the forward markets because of unusually high trading volume, political intervention or other factors. For example, the imposition of credit controls by governmental authorities might limit forward trading, to the possible detriment of the Fund.

In its forward trading, the Fund is subject to the risk of the bankruptcy of, or the inability or refusal to perform with respect to its forward contracts by, the principals with which the Fund trades. Funds on deposit with such principals are generally not protected by the same segregation requirements imposed on CFTC regulated commodity brokers in respect of customer funds on deposit with them. However, the Fund intends to engage in forward trading only with large, well-capitalized banks and dealers. The Fund may place forward trades through agents, so that the insolvency or bankruptcy of such agents could also subject the Fund to the risk of loss.

Exemption from Definition of Commodity Pool Operator

Pursuant to amendments by the Commodity Futures Trading Commission (“CFTC”), a U.S. government agency, the Adviser has filed a notice of exemption from registration as a “commodity pool operator” with respect to the Fund as provided by Rule 4.5 under the Commodity Exchange Act (“CEA”). The Fund and the Adviser are therefore not subject to registration or regulation as a pool operator under the CEA. In order to claim the Rule 4.5 exemption, the Fund is significantly limited in its ability to invest in commodity futures, options and swaps (including securities futures, broad-based stock index futures and financial futures contracts).

Short-Term Investments

The Fund may invest in any of the following securities and instruments:

Certificates of Deposit, Bankers' Acceptances and Time Deposits

The Fund may hold certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Fund will be dollar-denominated obligations of domestic banks, savings and loan associations or financial institutions which, at the time of purchase, have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. government.

In addition to buying certificates of deposit and bankers' acceptances, the Fund also may make interest-bearing time or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Commercial Paper and Short-Term Notes

The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by Standard & Poor's Ratings Group, "Prime-1" or "Prime-2" by Moody's Investors Service, Inc., or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the Adviser or the Sub-Adviser to be of comparable quality.

Repurchase Agreements

When cash is temporarily available, or for temporary defensive purposes, the Fund may invest without limit in repurchase agreements. A repurchase agreement is an agreement under which either U.S. Government obligations or other high-quality liquid debt securities are acquired from a securities dealer or bank subject to resale at an agreed-upon price and date. The securities are held for the Fund by a custodian bank as collateral until resold and will be supplemented by additional collateral if necessary to maintain a total value equal to or in excess of the value of the repurchase agreement. The Fund bears a risk of loss if the other party to a repurchase agreement defaults on its obligations and the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities, which may decline in value in the interim. The Fund will enter into repurchase agreements only with financial institutions determined by the Sub-Adviser to present minimal risk of default during the term of the agreement. Repurchase agreements are usually for a term of one week or less but may be for longer periods. Repurchase agreements maturing in more than seven days may be considered illiquid.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements. A reverse repurchase agreement has the characteristics of a secured borrowing by the Fund and creates leverage in the Fund's portfolio. In a reverse repurchase transaction, the Fund sells a portfolio instrument to another person, such as a financial institution or broker/dealer, in return for cash. At the same time, the Fund agrees to repurchase the instrument at an agreed-upon time and at a price that is greater than the amount of cash that the Fund

received when it sold the instrument, representing the equivalent of an interest payment by the Fund for the use of the cash. During the term of the transaction, the Fund will continue to receive any principal and interest payments (or the equivalent thereof) on the underlying instruments. The Fund may engage in reverse repurchase agreements as a means of raising cash to satisfy redemption requests or for other temporary or emergency purposes. Unless otherwise limited in the Prospectus or this SAI, the Fund may also engage in reverse repurchase agreements to the extent permitted by its fundamental investment policies in order to raise additional cash to be invested by the Fund's portfolio managers in other securities or instruments in an effort to increase the Fund's investment returns. During the term of the transaction, the Fund will remain at risk for any fluctuations in the market value of the instruments subject to the reverse repurchase agreement as if it had not entered into the transaction. When the Fund reinvests the proceeds of a reverse repurchase agreement in other securities, the Fund will also be at risk for any fluctuations in the market value of the securities in which the proceeds are invested. Like other leveraging risks, this makes the value of an investment in the Fund more volatile and increases the Fund's overall investment exposure. In addition, if the Fund's return on its investment of the proceeds of the reverse repurchase agreement does not equal or exceed the implied interest that it is obligated to pay under the reverse repurchase agreement, engaging in the transaction will lower the Fund's return. When the Fund enters into a reverse repurchase agreement, it is subject to the risk that the buyer under the agreement may file for bankruptcy, become insolvent or otherwise default on its obligations to the Fund. In the event of a default by the counterparty, there may be delays, costs and risks of loss involved in the Fund's exercising its rights under the agreement, or those rights may be limited by other contractual agreements or obligations or by applicable law. In addition, the Fund may be unable to sell the instruments subject to the reverse repurchase agreement at a time when it would be advantageous to do so, or may be required to liquidate portfolio securities at a time when it would be disadvantageous to do so in order to make payments with respect to its obligations under a reverse repurchase agreement. This could adversely affect the co-portfolio managers' strategy and result in lower Fund returns. At the time the Fund enters into a reverse repurchase agreement, the Fund is required to set aside cash or other appropriate liquid securities in the amount of the Fund's obligation under the reverse repurchase agreement or take certain other actions in accordance with SEC guidelines, which may affect the Fund's liquidity and ability to manage its assets. Although complying with SEC guidelines would have the effect of limiting the amount of Fund assets that may be committed to reverse repurchase agreements and other similar transactions at any time, it does not otherwise mitigate the risks of entering into reverse repurchase agreements.

Additional Risks

Risk of Potential Government Regulation of Derivatives

It is possible that government regulation of various types of derivative instruments, including futures and swaps, may limit or prevent the Fund from using such instruments as part of its investment strategy or may increase the costs associated with using those instruments and could ultimately prevent the Fund from being able to fully achieve its investment goals. With the adoption of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") (which was passed into law in July 2010) and analogous legislation in foreign jurisdictions, swaps have been brought under extensive regulatory schemes that include requirements for clearing of some swaps, methods for execution of some swaps, and margin and reporting requirements for swaps, among other requirements. As part of the Dodd-Frank Act regulatory scheme, swap dealers are subject to registration and business conduct requirements, which can increase the costs of swaps for all market participants. Some futures transactions and some swaps are or will be subject to limits on the number of positions that may be held by a single entity and certain related entities. In addition to regulations under the Dodd-Frank Act and futures regulations, the SEC may at some point complete formal regulations regarding limitations on the use of derivatives by registered investment companies, which could require the Fund to limit, modify or eliminate its derivatives activity.

The impact of the regulatory landscape on the Fund's ability to achieve its investment goals may change over time. The CFTC and US banking regulators have already adopted the majority of the swap-related regulations required on their part under the Dodd-Frank Act, but a significant number of required regulations under the SEC's jurisdiction are not yet complete. Foreign regulators are at various stages of adopting and implementing swap-related regulations. Some regulations are subject to phase-in periods, and regulators may fine tune those regulations that are currently in place. Futures transactions have long been subject to regulation, although the regulations relevant to the Fund may be reviewed by the CFTC and modified over time.

Fundamental Investment Limitations

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a "majority of the outstanding voting securities of the Fund," as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund.

The Fund may not:

1. Issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act, as amended, the rules and regulations promulgated thereunder or interpretations of the SEC or its staff;
2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;
3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. (Does not preclude the Fund from obtaining such short-term credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act of 1933, by virtue of disposing of portfolio securities);
4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate or real estate acquired as a result of such investments. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts);
5. Invest 25% or more of the market value of its assets in the securities of companies engaged in any one industry. (Does not apply to investment in the securities of the U.S. Government, its agencies or instrumentalities.);
6. Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that the Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the Commodity Futures Trading Commission, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities;

7. Make loans to others, except (a) through the purchase of debt securities in accordance with its investment objectives and policies, (b) to the extent the entry into a repurchase agreement is deemed to be a loan, and (c) by loaning portfolio securities; or
8. Make an investment unless 75% of the value of that Fund's total assets is represented by cash, cash items, U.S. government securities, securities of other investment companies and "other securities." For purposes of this restriction, the term "other securities" means securities as to which the Fund invests no more than 5% of the value of its total assets in any one issuer or purchases no more than 10% of the outstanding voting securities of any one issuer. As a matter of operating policy, each Fund will not consider repurchase agreements to be subject to the above-stated 5% limitation if all of the collateral underlying the repurchase agreements are U.S. government securities and such repurchase agreements are fully collateralized.

The following lists the non-fundamental investment restrictions applicable to the Fund. These restrictions can be changed by the Board of Trustees, but the change will only be effective after notice is given to shareholders of the Fund.

The Fund may not:

1. Invest in securities of other investment companies except as permitted under the 1940 Act or the rules thereunder;
2. Invest 15% or more of the value of its net assets, computed at the time of investment, in illiquid securities. Illiquid securities are those securities without readily available market quotations, including repurchase agreements having a maturity of more than seven days. Illiquid securities may include restricted securities not determined by the Board of Trustees to be liquid, non-negotiable time deposits, over-the-counter options and repurchase agreements providing for settlement in more than seven days after notice; or
3. Invest in other investment companies advised by the same investment adviser as the Fund or in investment companies advised by affiliates of such adviser.

Except with respect to borrowing and illiquid securities, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

Management of the Fund

Board of Trustees

The management and affairs of the Fund are supervised by the Board of Trustees. The Board of Trustees consists of five individuals, four (4) of whom are not "interested persons" (as defined under the 1940 Act) of the Trust and the Adviser ("Independent Trustees"). The Trustees are fiduciaries for the Fund's shareholders and are governed by the laws of the State of Delaware in this regard. The Board of Trustees establishes policies for the operation of the Fund and appoints the officers who conduct the daily business of the Fund.

Board Leadership Structure

The Trust is led by Mr. Brian Nielsen, who has served as the Chairman of the Board since 2011. Mr. Nielsen is an interested person by virtue of his former affiliation with Northern Lights Distributors, LLC (the Fund's Distributor). The Board of Trustees is comprised of Mr. Nielsen and four (4) Independent Trustees. Under certain 1940 Act governance guidelines that apply to the Trust, the Independent Trustees will meet in executive session, at least quarterly. Under the Trust's Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at board meetings, (b) calling

special meetings on an as-needed basis, (c) setting the agendas for board meetings and (d) ensuring board members are provided necessary materials in advance of each board meeting. The Trust believes that (i) its Chairman, Brian Nielsen (ii) Keith Rhoades, the independent chair of the Audit Committee, and, (iii) as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, its funds and each shareholder. The Independent Trustees have selected Anthony Lewis as the Lead Independent Trustee.

In accordance with the fund governance standards prescribed by the SEC under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board of Trustees because of his experience, qualifications, attributes and/or skills. The Board of Trustees reviews its leadership structure regularly, on at least an annual basis. The Board of Trustees believes that the structure described above facilitates the orderly and efficient flow of information to the Trustees from the officers of the Trust, the advisers of the funds that comprise the Trust and other service providers, and facilitates the effective evaluation of the risks and other issues, including conflicts of interest, that may impact the Trust as a whole as well as the funds individually. The Board of Trustees believes that the orderly and efficient flow of information and the ability of the Board of Trustees to bring each Trustee's experience and skills to bear in overseeing the Trust's operations is important given the characteristics and circumstances of the Trust, including: the unaffiliated nature of each investment adviser and the fund(s) managed by such adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent arrangements of each of the Trust's series. For these reasons, the Board of Trustees believes that its leadership structure is appropriate.

Board Responsibilities

The Board of Trustees' role is one of oversight rather than day-to-day management of any of the Trust's series. The Trust's Audit Committee assists with this oversight function. The Board of Trustees' oversight extends to the Trust's risk management processes. Those processes are overseen by Trust officers, including the President, the Treasurer, the Secretary and Chief Compliance Officer ("CCO"), who regularly report to the Board of Trustees on a variety of matters at Board meetings

Board Risk Oversight

The Board of Trustees is comprised of Mr. Nielsen and four (4) Independent Trustees with a standing independent Audit Committee with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its CCO at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee also considers financial and reporting risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the CCO is the primary recipient and communicator of such risk-related information and oversees the Trust's service providers adherence to the Trust's policies and procedures.

Investment advisers managing the Trust's series report to the Trust's CCO and the Board of Trustees, on a regular and as-needed basis, on actual and possible risks affecting the Trust's series. These investment advisers report to the CCO and Board of Trustees on various elements of risk, including investment, credit, liquidity, valuation, operational and compliance risks, as well as any overall business risks that could impact the Trust's series.

The Board of Trustees has appointed the CCO, who reports directly to the Board of Trustees and who participates in its regular meetings. In addition, the CCO conducts on-going and continuous compliance testing and presents an annual report to the Board of Trustees in accordance with the Trust's compliance policies and procedures. The CCO, together with the Trust's President, Treasurer and Secretary, regularly

discuss risk issues affecting the Trust and its series during Board of Trustee meetings. The CCO also provides updates to the Board of Trustees on the operation of the Trust’s compliance policies and procedures and on how these procedures are designed to mitigate risk. Finally, the CCO and/or other officers of the Trust report to the Board of Trustees in the event that any material risk issues arise in between Board meetings.

Trustee Qualifications

Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills. Mr. Nielsen has over eighteen years of business experience in the investment management and brokerage business, including a focus in compliance, legal and regulatory oversight and possesses a strong understanding of the regulatory framework under which investment companies must operate. Since 2010, Mr. Sarkany has been the President of TTS Consultants, LLC, a financial services firm and from 1994 through 2010, held various roles at Value Line, Inc. (a publicly held company providing financial research, publications and money management services to retail and institutional investors), including Director of Marketing and Asset Management, Director of Index Licensing, and member of the Board of Directors. Anthony Lewis has been Chairman and CEO of The Lewis Group USA, an executive consulting firm, for the past ten years, and also serves as a Director, the Chairman of the Compensation Committee, and a Member of the Audit Committee of Torotel Inc. Keith Rhoades held various accounting roles at Union Pacific Railroad, including Senior Director of General Ledger/Financial Research. Randy Skalla has more than 20 years of investment management experience including serving as the President of L5 Enterprises, Inc. since 2001 and from 2001 through 2017 Mr. Skalla was a member of the Orizon Investment Counsel Board. The Trust does not believe any one factor is determinative in assessing a Trustee’s qualifications, but that the collective experience of each Trustee makes them each highly qualified.

The Board of Trustees has established three standing board committees – the Audit Committee, the Compensation Committee and the Nominating Committee. All Independent Trustees are members of the Audit Committee, Compensation Committee and the Nominating Committee. Inclusion of all Independent Trustees as members of all three of the standing board committees allows all such Trustees to participate in the full range of the Board of Trustees’ oversight duties, including oversight of the risk management processes.

Trustees and Officers

The Trustees and the officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years. Unless otherwise noted, the address of each Trustee and Officer is 17645 Wright Street, Suite 200, Omaha, NE 68130.

Independent Trustees

Name, Address and Year of Birth	Position/Term of Office*	Principal Occupation During the Past Five Years	Number of Portfolios in Fund Complex*** Overseen by Trustee	Other Directorships held by Trustee During the Past Five Years

* The term of office for each Trustee and Officer listed above will continue indefinitely.

** Brian Nielsen is an “interested person” of the Trust as that term is defined under the 1940 Act, because of his prior affiliation with Northern Lights Distributors, LLC (the Fund’s Distributor).

***As of October 31, 2018, the Trust was comprised of 22 active portfolios managed by unaffiliated investment advisers. The term “Fund Complex” applies only to the Fund and the Balter European L/S Small Cap Fund and the Balter L/S Small Cap Equity Fund (the “Balter Funds”) managed by the same Adviser. The Funds do not hold themselves out as related to any other series within the Trust for investment purposes, nor do they share the same investment adviser with any other series.

Board Committees

Audit Committee. The Board has an Audit Committee, which is comprised of the independent members of the Board of Trustees. The Audit Committee reviews financial statements and other audit-related matters for the Fund. The Audit Committee also holds discussions with management and with the Fund’s independent auditor concerning the scope of the audit and the auditor’s independence and will meet at least four times annually. During the fiscal year ended October 31, 2018 the Audit Committee met ten times.

Nominating Committee. The Board has a Nominating Committee, which is comprised of the independent members of the Board of Trustees. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary. The Nominating Committee generally will not consider shareholder nominees.

Compensation Committee. The Board has a Compensation Committee, which is comprised of the independent members of the Board of Trustees. The role of the Compensation Committee is to oversee the evaluation of, and review and approve compensation for, the independent members of the Board of Trustees. The Compensation Committee will generally meet annually.

Other Committees of the Trust

Valuation Committee. The Trust has a Valuation Committee. The Valuation Committee is responsible for the following: (1) monitoring the valuation of Fund securities and other investments; and (2) as required, when the Board of Trustees is not in session, determining the fair value of illiquid securities and other holdings after consideration of all relevant factors, which determinations are reported to the Board. The Valuation Committee shall, at all times, consist of no less than three members, including the Trust’s President and Treasurer, and may include such number of alternate members that are officers of the Trust’s Administrator or the investment adviser of a series of the Trust as the Board of Trustees or the members of the Valuation Committee may from time to time designate. The Valuation Committee meets as necessary when a price for a portfolio security is not readily available.

Trustee Compensation

Effective January 1, 2019, each Trustee will receive a quarterly fee of \$21,250 (the “Trustee Fee”) to be paid at the beginning of each calendar quarter, allocated among each of the various portfolios comprising the Trust. Each Trustee will also receive reimbursement for any reasonable expenses incurred attending the regular quarterly meetings of the Trust. In addition to the Trustee Fee, the Audit Committee Chairman

will receive an additional quarterly fee of \$4,000 and the Chairman of the Trust will receive an additional quarterly fee of \$5,250. For special in-person meetings, each Trustee will receive a \$2,500 special in-person meeting fee, as well as reimbursement for any reasonable expenses incurred attending the special in-person meeting, which fees will generally be paid by the Adviser requesting the special in-person meeting. None of the executive officers will receive compensation from the Trust.

Prior to January 1, 2019, each Trustee received a quarterly fee of \$20,000 (the “Trustee Fee”) paid at the beginning of each calendar quarter, allocated among each of the various portfolios comprising the Trust. Each Trustee also received reimbursement for any reasonable expenses incurred attending the regular quarterly meetings of the Trust. In addition to the Trustee Fee, the Audit Committee Chairman received an additional quarterly fee of \$3,750 and the Chairman of the Trust received an additional quarterly fee of \$5,000. For special in-person meetings, each Trustee received a \$2,500 special in-person meeting fee, as well as reimbursement for any reasonable expenses incurred attending the special in-person meeting, which fees were generally be paid by the Adviser requesting the special in-person meeting. None of the executive officers received compensation from the Trust.

The table below details the amount of compensation the Trustees received from the Balter Funds during the period ended October 31, 2018.

Name	The Balter Invenomic Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From the Fund Complex Paid to Trustees***
Thomas T. Sarkany	\$3,648	None	None	\$10,944
Anthony Lewis	\$3,648	None	None	\$10,944
Keith Rhoades*	\$4,339	None	None	\$13,017
Randy Skalla	\$3,648	None	None	\$10,944
Brian Nielsen**	\$3,423	None	None	\$10,269

*Mr. Rhoades also serves as chairman of the Audit Committee.

**Mr. Nielsen is deemed to be an ‘interested person’ as defined in the 1940 Act as a result of his prior affiliation with Northern Lights Distributors, LLC (the Fund’s Distributor). Mr. Nielsen also serves as Chairman of the Trust

*** There are currently multiple series comprising the Trust. The term “Fund Complex” refers only to the Balter Funds, and not to any other series of the Trust. For the period ended October 31, 2018, aggregate Independent Trustees’ fees were \$410,000.00

Trustee Ownership

The following table indicates the dollar range of equity securities that each Trustee beneficially owned in the Fund and other series of the Trust as of December 31, 2018.

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Thomas T. Sarkany	None	None
Anthony H. Lewis	None	None
Keith Rhoades	None	None
Randal D. Skalla	None	None
Brian Nielsen*	None	None

* Brian Nielsen is deemed to be an ‘interested person’ as defined in the 1940 Act as a result of his prior affiliation with Northern Lights Distributors, LLC (the Funds’ Distributor).

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by the Fund.

As of February 1, 2019, the following persons owned, beneficially or of record, 5% or more of a Class of shares of the Fund:

<u>Name of Shareholder</u>	<u>% Of Share Class Owned</u>
<u>Institutional Class Shares</u>	
J.P. Morgan Securities LLC FBO 580-87475-12 4 Chase Metrotech Center Brooklyn, NY 11245-0001	39.05%
Charles Schwab & Co. Inc. Special Custody A/C FBO Customers ATTN Mutual Funds 211 Main Street San Francisco, CA 94105-1905	39.05%
TD Ameritrade Inc. FBO Our Customers P.O. Box 2226 Omaha, NE 68103-2226	6.82%
<u>Investor Class Shares</u>	
TD Ameritrade Inc. FBO Our Customers P.O. Box 2226 Omaha, NE 68103-2226	57.21%
Charles Schwab & Co. Inc. Special Custody A/C FBO Customers ATTN Mutual Funds 211 Main Street San Francisco, CA 94105-1905	36.72%

Investment Adviser

As stated in the Prospectus, investment advisory services are provided to the Fund by Balter Liquid Alternatives, LLC, located at 125 High Street, Oliver Street Tower, Suite 802, Boston, MA 02110, pursuant to an Investment Advisory Agreement (the "Advisory Agreement"). The Adviser is controlled by Balter Capital Management ("BCM"). BCM, in turn is controlled by Brad R. Balter. The Adviser is also controlled by Antler LLC, which, in turn is controlled by The David A. Sackler 2012 Trust, The Marianna R. Sackler 2012 Trust, The Rebecca K. Sackler 2012 Trust and Wasatch LLC.

Subject to such policies as the Board of Trustees may determine, the Adviser is ultimately responsible for investment decisions for the Fund. Pursuant to the terms of the Advisory Agreement, the Adviser provides the Fund with such investment advice and supervision as it deems necessary for the proper supervision of the Fund's investments.

After an initial period of two years, the Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund's outstanding voting securities and by a majority of the trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund upon 60 days' prior written notice when authorized either by a majority vote of the Fund's shareholders or by a vote of a majority of the Board of Trustees, or by the Adviser upon 60 days' prior written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser, under such agreement, shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

Under the Advisory Agreement, the Adviser, under the supervision of the Board, agrees (directly or through a subadviser) to invest the assets of the Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in the Fund's current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser shall act as the investment adviser to the Fund and, as such shall (directly or through a subadviser) (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold or retained by the Fund, and implement those decisions, including the selection of entities with or through which such purchases or sales are to be effected; provided, that the Adviser (directly or through a subadviser) will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Fund with all necessary office facilities and personnel for servicing the Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Fund or the Adviser performing services relating to research, statistical and investment activities. The Advisory Agreement was approved by the Board of the Trust, including by a majority of the Independent Trustees, at a meeting held on April 18-19, 2017.

In addition, the Adviser, directly subject to the supervision of the Board of Trustees, provides the management services necessary for the operation of the Fund and such additional administrative services as reasonably requested by the Board of Trustees. These services include providing such office space, office equipment and office facilities as are adequate to fulfill the Adviser's obligations under the Advisory Agreement; assisting the Trust in supervising relations with custodians, transfer and pricing agents, accountants, underwriters and other persons dealing with the Fund; assisting in preparing all general shareholder communications and conducting shareholder relations; assuring the Fund's records and the registration of the Fund's shares under federal securities laws and making necessary filings under state securities laws; developing management and shareholder services for the Fund; and furnishing reports, evaluations and analyses on a variety of subjects to the Trustees.

Pursuant to the Advisory Agreement, the Fund pays the Adviser a management fee at the annual rate of 2.00% of the Fund’s average daily net assets.

The fee is computed daily and payable monthly. The Adviser has agreed contractually to waive its management fee and to reimburse operating expenses (excluding any front-end or contingent deferred sales loads, brokerage fees and commissions, acquired fund fees and expenses, borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary or non-recurring expenses, including, but not limited to, litigation) at least until February 28, 2020, such that net annual fund operating expenses of the Fund do not exceed the percentages in the table below. This operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser is permitted to receive reimbursement from the Fund for fees it waived and Fund expenses it paid, subject to the limitation that: (1) the reimbursement for fees and expenses will be made only if payable within three years from the date the fees and expenses were initially waived or reimbursed; and (2) the reimbursement may not be made if it would cause the expense limitation in effect at the time of the waiver or currently in effect, whichever is lower, to be exceeded. Fee waiver and reimbursement arrangements can decrease the Fund’s expenses and increase its performance.

Share Class	Expense Cap
Institutional Class	2.24%
Investor Class	2.54%

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Fund. Under the terms of the Advisory Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled “The Distributor”) (c) the fees and certain expenses of the Custodian (as defined under the section entitled “Custodian”) and Transfer and Dividend Disbursing Agent (as defined under the section entitled “Transfer Agent”), including the cost of maintaining certain required records of the Fund and of pricing the Fund’s shares, (d) the charges and expenses of legal counsel and independent accountants for the Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by the Fund to governmental agencies, (g) the fees of any trade association of which the Fund may be a member, (h) the cost of share certificates representing shares of the Fund, (i) the cost of fidelity and liability insurance, (j) the fees and expenses involved in registering and maintaining registration of the Fund and of its shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund’s registration statements and prospectuses for such purposes, (k) all expenses of shareholders and Trustees’ meetings (including travel expenses of trustees and officers of the Trust who are directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders, and (l) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Trust’s business.

For the fiscal year ended October 31 the Fund paid the following advisory fees to the Adviser pursuant to the Advisory Agreement, of which the Adviser waived or recouped the amount set forth in the table below.

Fiscal Year Ended	Advisory Fee	Recoupment (Waiver)	Advisory Fee after Recoupment (Waiver)
October 31, 2018	\$974,801	(\$90,849)	\$833,952
October 31, 2017*	\$190,673	(\$43,963)	\$146,710

*The Fund commenced operations on June 19, 2017.

Sub-Adviser

As discussed in the Prospectus, Invenomic Capital Management, LP, 125 High Street, Oliver Street Tower, Suite 802, Boston, MA 02110, serves as the Sub-Adviser to the Fund under a sub-advisory agreement with the Adviser on behalf of the Fund (the “Sub-Adviser” or “Invenomic”). Invenomic is registered as an investment adviser with the SEC. Invenomic was founded in December 2015 as a limited partnership incorporated in Delaware and Ali Motamed is the principal owner and control person.

The Sub-Adviser has agreed to furnish continuously an investment program for its assigned portion of the Fund that it sub-advises and shall determine from time to time in its discretion the securities and other investments to be purchased or sold or exchanged and what portions of the Fund’s assets allocated to it shall be held in various securities, cash or other. In this connection, the Sub-Adviser shall provide the Adviser and the officers and trustees of the Trust with such reports and documentation as the latter shall reasonably request regarding the Sub-Adviser’s management of the Fund assets. The Sub-Adviser shall carry out its responsibilities in compliance with: (a) the Fund’s investment objective, policies and restrictions as set forth in the Trust’s current registration statement, (b) such policies or directives as the Trust’s trustees may from time to time establish or issue and communicate to the Sub-Adviser in writing, and (c) applicable law and related regulations.

The Adviser has the responsibility for portfolio management, communicating performance expectations and evaluations to the sub-advisers and ultimately recommending to the Board of Trustees whether their sub-advisory agreements should be renewed, modified or terminated. The Adviser provides written reports to the Board of Trustees regarding the results of its evaluation and monitoring functions. The SEC has granted, an exemptive order to the Adviser, which extends to other registered investment companies advised by the Adviser, including the Fund, which permits the Adviser, subject to certain conditions, to hire new sub-advisers or to continue the employment of existing sub-advisors after events that would otherwise cause an automatic termination of a sub-advisory agreement. Within 90 days of retaining a new sub-adviser, shareholders of the Fund will receive notification of the change. This arrangement has been approved by the Board of Trustees and the Fund’s initial shareholder.

The Adviser will pay the sub-advisers monthly an annual fee of the net assets of the Fund allocated to that sub-adviser by the Adviser which the Adviser will pay out of the advisory fee paid to the Adviser pursuant to the Advisory Agreement. The Fund is not responsible for the payment of the sub-advisory fees. The Adviser is also responsible for conducting all operations of the Fund, except those operations contracted to the sub-advisers, the Custodian, the transfer agent or the administrator. Although the sub-advisers’ activities are subject to oversight by the Board of Trustees and the officers of the Trust, neither the Board of Trustees, the officers nor the Adviser evaluate the investment merits of the sub-advisers’ individual security selections. The sub-advisers may have complete discretion to purchase, manage and sell portfolio securities for the portions of the Fund’s portfolio that they manage, subject to the Fund’s investment objective, policies and limitations, and the oversight of the Fund’s portfolio manager.

Portfolio Managers

The following section provides information regarding the Portfolio Managers, other accounts managed by the Portfolio Managers, compensation, material conflicts of interests, and any ownership of securities in the Fund. Mr. Motamed serves as the lead portfolio manager for the Fund.

The Adviser

Brad R. Balter, CFA. Mr. Balter, a Co-Founder, Managing Partner, and the CEO of BCM and the Adviser, is a co-portfolio manager of the Fund. He has worked in the financial services industry since 1992. Prior to forming BCM, he was a Managing Director at Citigroup Global Markets.

Jay C. Warner, CFA. Mr. Warner, a Co-Founder, Partner and Chief Operating Officer of BCM and the Adviser, is a co-portfolio manager of the Fund. Prior to 2005, Mr. Warner was a Financial Analyst in middle market sales for Citigroup Global Markets and was a generalist at The Segalas Group, a long/short equity hedge fund.

Benjamin R. Deschaine, C.A.I.A. Mr. Deschaine, a Partner and Chief Investment Officer of BCM and the Adviser, is a co-portfolio manager of the Fund. Prior to 2012, Mr. Deschaine was a Managing Director at Sabretooth Capital Management, LLC, a global multi-strategy hedge fund affiliated with Tiger Management and a Portfolio Manager and Senior Analyst at Federal Street Advisors.

The Sub-Adviser

Ali Motamed. Mr. Motamed is the Managing Partner of the Sub-Adviser. Prior to forming the Sub-Adviser, he was a Senior Analyst and a Portfolio Manager with Robeco Investment Management, Inc. (“RIM”), specializing in fundamental research of stocks held in the Boston Partners Long/Short Equity Fund and related strategy. He joined the RIM in 2003, having previously held positions at Deutsche Bank and BT Wolfensohn, where he was a member of the global mergers and acquisitions teams. Mr. Motamed holds a B.A. degree in economics with a minor in accounting from the University of California, Los Angeles, and an M.B.A. degree from Harvard Business School. He holds the Chartered Financial Analyst designation. He has over fifteen years of experience.

Other Accounts Managed by the Portfolio Managers

The table below identifies, for the Portfolio Manager of the Fund, the number of accounts managed (excluding the Fund) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. To the extent that the advisory fees for any of these accounts are based on account performance, this information is reflected in separate tables below. Asset amounts are approximate as of the date of this SAI, and have been rounded. The following table lists the number and types of accounts managed by the portfolio manager and assets under management in those accounts as of October 31, 2018.

Portfolio Managers	Registered Investment Companies (excluding the Fund)		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets in the Accounts	Number of Accounts	Total Assets in the Accounts	Number of Accounts	Total Assets in the Accounts
The Adviser						
Brad R. Balter	2	\$280 million	0	\$0	22	\$511 million
Jay C. Warner	2	\$280 million	0	\$0	22	\$511 million
Ben R. Deschaine	2	\$280 million	0	\$0	0	\$0
The Sub-Adviser						
Ali Motamed	0	\$0	1	\$8 million	0	\$0

Material Conflicts of Interest

Actual or apparent material conflicts of interest may arise when a Portfolio Manager has day-to-day management responsibilities with respect to more than one investment account or in other circumstances. Portfolio Managers who manage other investment accounts in addition to the Fund may be presented with the potential conflicts described below.

Balter

Because Balter performs investment management services for various clients, certain conflicts of interest could arise. Balter may give advice and take action with respect to its other clients and/or funds that may differ from advice given or the timing or nature of action taken with respect to the Fund. Balter will have no obligation to purchase or sell for the Fund, or to recommend for purchase or sale by the Fund, any security that Balter, its principals, its affiliates, or its employees may purchase for themselves or for other clients and/or funds at the same time or the same price. Where Balter buys or sells the same security for two or more clients, it may place concurrent orders with a single broker, to be executed together as a single “block” in order to facilitate orderly and efficient execution.

Invenomic

Potential conflicts of interest may arise when the Fund’s Portfolio Manager also has day-to-day management responsibilities with respect to one or more other funds or other accounts, as is the case for the Fund’s Portfolio Manager.

The Sub-Adviser has adopted compliance policies and procedures that are designed to address various conflicts of interest that may arise for the Sub-Adviser and the individuals that it employs. For example, the Sub-Adviser has adopted trade allocation procedures that are designed to facilitate the fair allocation of investment opportunities among multiple funds and accounts. There is no guarantee, however, that the policies and procedures adopted by the Sub-Adviser will be able to detect and/or prevent every situation in which an actual or potential conflict may appear. These potential conflicts include:

Allocation of Limited Time and Attention. The Portfolio Manager may be responsible for managing multiple funds and/or accounts and may devote unequal time and attention to the management of those funds and/or accounts. The effects of this potential conflict may be more pronounced where funds and/or accounts overseen by the Portfolio Manager have different investment strategies.

Allocation of Investment Opportunities. If the Portfolio Manager identifies an investment opportunity that may be suitable for multiple funds and/or accounts, the opportunity may be allocated among these several funds or accounts, which may limit the Fund’s ability to take full advantage of the investment opportunity. The Sub-Adviser has adopted policies and procedures to ensure that all accounts, including the Fund, are treated equitably.

Pursuit of Differing Strategies. At times, the Portfolio Manager may determine that an investment opportunity may be appropriate for only some of the funds and/or accounts for which he exercises investment responsibility, or may decide that certain of the funds and/or accounts should take differing positions with respect to a particular security. In these cases, the Portfolio Manager may place separate transactions for one or more funds or accounts which may affect the market price of the security or the execution of the transaction, or both, to the detriment or benefit of one or more other funds and/or accounts.

Selection of Broker/Dealers. In addition to executing trades, some broker/dealers provide brokerage and research services (as those terms are defined in Section 28(e) of the U.S. Securities Exchange Act of 1934), which may result in the payment of higher brokerage fees than might have otherwise been available. These services may be more beneficial to certain funds or accounts than to others.

Variation in Compensation. A conflict of interest may arise where the financial or other benefits available to the Portfolio Manager differ among the funds and/or accounts that he manages. If the structure of the

Sub-Adviser’s fee differs among funds and/or accounts (such as where certain funds or accounts pay higher management fees or performance-based management fees), the Portfolio Manager might be motivated to help certain funds and/or accounts over others. The Portfolio Manager might be motivated to favor funds and/or accounts in which he or she has an interest or in which the Sub-Adviser and/or its affiliates have interests. Similarly, the desire to maintain assets under management or to enhance the Portfolio Manager’s performance record or to derive other rewards, financial or otherwise, could influence the Portfolio Manager in affording preferential treatment to those funds and/or accounts that could most significantly benefit the Portfolio Manager

Portfolio Manager’s Compensation

The following section describes the structure of, and the methods used to determine the different types of compensation (e.g., salary, bonus, deferred compensation, retirement plans and arrangements) for each of the Fund’s portfolio managers as of the most recent practicable date.

Balter

Balter’s portfolio managers are compensated with a base salary which is determined by individual and firm-wide performance as well as an annual incentive bonus. Annual bonus compensation is determined by a number of factors, including the annual performance of the strategy, the performance over various other time periods, the total value of the assets in the strategy, the profitability of the Adviser, and trends in industry compensation levels and practices. Balter’s portfolio managers participate in the parent firm, BCM’s profit share plan and defined benefit plan.

Invenomic

The Portfolio Manager has an ownership interest in the Sub-Adviser, and therefore receives a portion of its profits. The Portfolio Manager also receives a fixed base salary and a bonus. Bonus compensation is reviewed annually and is determined by a number of factors, including the annual performance of the strategy, the performance over various other time periods, the total value of the assets in the strategy, the profitability of the Sub-Adviser, and trends in industry compensation levels and practices. The Portfolio Manager is also eligible to receive employee benefits, including, but not limited to, health care and other insurance benefits and participation in a retirement plan program.

Portfolio Managers’ Ownership of the Fund

As of October 31, 2018, the following portfolio managers beneficially owned shares of the Fund:

Portfolio Manager	Dollar Range of Shares Owned
The Adviser	
Brad R. Balter	Over \$100,000
Jay C. Warner	Over \$100,000
Ben R. Deschaine	\$ \$50,000 - \$100,000
The Sub-Adviser	
Ali Motamed	Over \$1 million

Other Service Providers

Administrator

Pursuant to a Fund Services Agreement (the “Administration Service Agreement”), Gemini Fund Services, LLC (“GFS”), 80 Arkay Drive, Suite 110, Hauppauge, NY 11788 (the “Administrator”), acts as administrator for the Fund, subject to the supervision of the Board. GFS is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. GFS is an affiliate of the Distributor. GFS may provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of GFS or its affiliates.

Effective February 1, 2019, NorthStar Financial Services Group, LLC, the parent company of GFS and its affiliated companies including Northern Lights Distributors, LLC and Northern Lights Compliance Services, LLC (collectively, the “Gemini Companies”), sold its interest in the Gemini Companies to a third party private equity firm that contemporaneously acquired Ultimus Fund Solutions, LLC (an independent mutual fund administration firm) and its affiliates (collectively, the “Ultimus Companies”). As a result of these separate transactions, the Gemini Companies and the Ultimus Companies are now indirectly owned through a common parent entity, The Ultimus Group, LLC.

The Administration Service Agreement was initially approved by the Board with respect to the Fund at a meeting held April 18-19, 2017. The Agreement shall remain in effect for 2 years from the date of the Fund’s commencement of operations, and subject to annual approval of the Board for one-year periods thereafter. The Administration Service Agreement is terminable by the Board or GFS on 60 days’ prior written notice and may be assigned provided the non-assigning party provides prior written consent. This Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of GFS or reckless disregard of its obligations thereunder, GFS shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the Administration Service Agreement, GFS provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of the Fund; (ii) facilitating the performance of administrative and professional services to the Fund by others, including the Fund’s Custodian; (iii) preparing, but not paying for, the periodic updating of the Fund’s Registration Statement, Prospectuses and Statement of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to the Fund’s shareholders and the SEC; (iv) preparing in conjunction with Fund counsel, but not paying for, all filings under the securities or “Blue Sky” laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of the Fund and/or its shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; and (vi) monitoring daily and periodic compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the Prospectus.

For the services rendered to the Fund by the Administrator, the Fund pays the Administrator the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets for fund administration, fund accounting and transfer agency services.

For the fiscal years ended October 31 the Fund paid the following fee for fund administration, fund accounting and transfer agent services:

Fiscal Year Ended	Administration Fees
October 31, 2018	\$59,730
October 31, 2017*	\$11,180

*The Fund commenced operations on June 19, 2017.

Fund Accounting

GFS, pursuant to the Administration Service Agreement, provides the Fund with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among the Fund's custodian or Adviser; and (vii) monitoring and evaluating daily income and expense accruals, and sales and redemptions of shares of the Fund. The Fund also pays the Administrator for any out-of-pocket expenses.

Transfer Agent

GFS, 17645 Wright Street, Suite 200, Omaha, NE 68130, acts as transfer, dividend disbursing, and shareholder servicing agent for the Fund pursuant to a written agreement with the Fund. Under the agreement, GFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

Custodian

U.S. Bank, National Association ("U.S. Bank"), 1555 North River Center Drive, Milwaukee, WI 53212, serves as the custodian of the Fund's assets pursuant to a Custody Agreement by and between the Custodian and the Trust on behalf of the Fund. The Custodian's responsibilities include safeguarding and controlling the Fund's cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Fund's investments. Pursuant to the Custody Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Fund may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Securities Lending Activities

U.S. Bank, National Association ("U.S. Bank") serves as the Funds' securities lending agent pursuant to a Securities Lending Authorization Agreement between U.S. Bank and the Trust on behalf of the Fund. The dollar amounts of income and fees and compensation paid to the Fund and U.S. Bank related to the Funds' respective securities lending activities during fiscal year ended October 31, 2018 were as follows:

	Balter Invenomic Fund
Gross income from securities lending activities (including income from cash collateral reinvestment)	\$1,516
Fees and/or compensation for securities lending activities and related services	-
Fees paid to securities lending agent from a revenue split	\$378

Fees paid for any cash collateral management service (including fees deducted from a pooled cash collateral reinvestment vehicle) that are not included in the revenue split*	-
Administrative fees not included in revenue split	-
Indemnification fees not included in revenue split	-
Rebate (paid to borrower)	-
Other fees not included in revenue split	-
Aggregate fees/compensation for securities lending activities	\$378
Net income from securities lending activities	\$1,138

* The Funds' cash collateral was invested in the Mount Vernon Liquid Assets Portfolio, LLC during the fiscal year ended October 31, 2018.

The services provided by U.S. Bank as securities lending agent are as follows: selection of securities available to be loaned; locating borrowers previously approved by the Fund's board; negotiation of loan terms; monitoring daily the value of the loaned securities and collateral; requiring additional collateral as necessary; investing cash collateral in accordance with the Fund's instructions; marking to market non-cash collateral; maintaining custody of non-cash collateral; recordkeeping and account servicing; monitoring dividend activity and material proxy votes relating to loaned securities; transferring loaned securities; recalling loaned securities in accordance with the fund's instructions; and arranging for return of loaned securities to the fund at loan termination.

Compliance Services

Northern Lights Compliance Services, LLC ("NLCS"), 17645 Wright Street, Suite 200, Omaha, NE 68130, an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. The Fund pays a compliance service fee to NLCS.

For the fiscal years ended October 31 the Fund paid the following fee for compliance services:

Fiscal Year Ended	Compliance Service Fees
October 31, 2018	\$18,276
October 31, 2017*	\$8,834

*The Fund commenced operations on June 19, 2017.

Legal Counsel

Alston & Bird, LLP, 950 F Street NW, Washington, D.C. 20004, serves as counsel to the Trust.
Blank Rome LLP, 405 Lexington Avenue, New York, NY 10174, serves as counsel to the Independent Trustees.

Independent Registered Public Accounting Firm

Tait, Weller & Baker LLP, Two Liberty Place, 50 South 16th Street, Suite 2900, Philadelphia, PA 19102, serves as the independent registered public accounting firm of the Fund.

Distribution of Fund Shares

Northern Lights Distributors, LLC, located at 17645 Wright Street, Suite 200, Omaha, NE 68130 (the “Distributor”) serves as the principal underwriter and national distributor for the shares of the Fund pursuant to an underwriting agreement with the Trust (the “Underwriting Agreement”). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state’s securities laws and is a member of FINRA. The offering of the Fund’s shares are continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of Fund shares, will use reasonable efforts to facilitate the sale of the Fund’s shares.

The Underwriting Agreement has an initial term of two years and will continue in effect only if such continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund’s outstanding voting securities and, in either case, by a majority of the trustees who are not parties to the Underwriting Agreement or “interested persons” (as defined in the 1940 Act) of any such party. The Underwriting Agreement is terminable without penalty by the Trust on behalf of the Fund on 60 days’ notice when authorized either by a majority vote of the Fund’s outstanding voting securities or by vote of a majority of the Board of Trustees, including a majority of the trustees who are not “interested persons” (as defined in the 1940 Act) of the Trust, or by the Distributor on 60 days’ notice, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act).

The following table sets forth the total compensation received by the Distributor from the Fund during the fiscal year ended October 31, 2018.

<i>Fund</i>	<i>Net Underwriting Discounts and Commissions</i>	<i>Compensation on Redemptions and Repurchases</i>	<i>Brokerage Commissions</i>	<i>Other Compensation</i>
Institutional Class Shares	\$0	\$0	\$0	*

* The Distributor received \$90,510 from the Adviser as compensation for its distribution services to the Balter Funds.

The Distributor also receives 12b-1 fees from the Funds as described under the following section entitled “12b-1 Distribution Plan”.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of the Fund and may allow concessions to dealers that sell shares of the Fund.

12b-1 Distribution and Shareholder Servicing Plan

As noted in the Prospectus, the Trust has adopted a Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 under the 1940 Act for the Fund’s Investor Class shares (the “Plan”) pursuant to which Investor Class shares of the Fund are authorized to pay fees to the Distributor for providing distribution and/or shareholder services to the Fund. Under the Plan, Investor Class shares of the Fund may pay a combined distribution or shareholder servicing fee at an annual rate of up to 0.25% of the average net assets of Investor Class shares as compensation for the Distributor providing account maintenance and/or distribution services to shareholders. Such fees are to be paid by the Fund monthly, or at such other intervals, as the Board shall determine. Such fees shall be based upon each share class’s average daily net assets during the preceding month, and shall be calculated and accrued daily. The Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board of the Trust and the Distributor. Each Plan authorizes payments to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others (“Recipients”) to provide these services and paying compensation for these services.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or

prospective clients of the respective recipients; answering routine inquiries concerning the Fund; assisting in the establishment and maintenance of accounts or sub-accounts in the Fund and in processing purchase and redemption transactions; making the Fund's investment plan and shareholder services available; and providing such other information and services to investors in shares of the Fund as the Distributor or the Trust, on behalf of the Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Fund. The Adviser may be compensated by the Distributor for its distribution and marketing efforts.

The Distributor is required to provide a written report, at least quarterly to the Board of the Trust, specifying in reasonable detail the amounts expended pursuant to the Rule 12b-1 Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The initial term of the Rule 12b-1 Plan is one year and will continue in effect from year to year thereafter, provided such continuance is specifically approved at least annually by a majority of the Board of the Trust and a majority of the Trustees who are not "interested persons" of the Trust and do not have a direct or indirect financial interest in the Rule 12b-1 Plan ("Rule 12b-1 Trustees") by votes cast in person at a meeting called for the purpose of voting on the Rule 12b-1 Plan. The Rule 12b-1 Plan may be terminated at any time by the Trust or the Fund by vote of a majority of the Rule 12b-1 Trustees or by vote of a majority of the outstanding voting shares of the Fund.

The Rule 12b-1 Plan may not be amended to increase materially the amount of the Distributor's compensation to be paid by the Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of the Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board of the Trust and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on a Rule 12b-1 Plan. During the term of a Rule 12b-1 Plan, the selection and nomination of non-interested Trustees of the Trust will be committed to the discretion of current non-interested Trustees. The Distributor will preserve copies of the Rule 12b-1 Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to the Rule 12b-1 Plan will be in writing and provide that: (a) it may be terminated by the Trust or the applicable Fund at any time upon sixty days' written notice, without the payment of any penalty, by vote of a majority of the Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Trust or Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement.

To the extent these asset-based fees and other payments made under the Distribution Plan to these financial intermediaries for the distribution services they provide to the Fund's shareholders exceed the Distribution Fees available, these payments are made by the Adviser from its own resources, which may include its profits from the advisory fee it receives from the Fund. In addition, the Fund may participate in various "fund supermarkets" in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor's customers without charging the customers a sales charge. In connection with its participation in such platforms, the Adviser may use all or a portion of the Distribution Fee to pay one or more supermarket sponsors a negotiated fee for distributing the Fund's shares. In addition, in its discretion, the Adviser may pay additional fees to such intermediaries from its own assets.

For the fiscal year ended October 31, 2018, the Fund paid the following allocated distribution fees:

Rule 12b-1 Expenditures Paid by the Fund During the Period Ended October 31, 2018	
	Total Dollars Allocated
	<u>Investor Class</u>
Advertising/Marketing	None
Printing/Postage	None
Payment to Distributor	\$2,428
Payment to dealers	\$3,723
Compensation to sales personnel	None
Other	\$0
Total	\$6,151

Shareholding Servicing Plan

Pursuant to a Shareholder Service Plan (the “Plan”) adopted by the Trust established by the Fund with respect to the Investor class of the Fund, the Adviser is authorized to provide, or arrange for others to provide personal shareholder services relating to the servicing and maintenance of shareholder accounts not otherwise provided to the Fund (“Shareholder Servicing Activities”). Under the Plan, the Adviser may enter into shareholder service agreements with securities broker-dealers and other securities professionals (“Service Organizations”) who provide Shareholder Servicing Activities for their clients invested in the Fund. Shareholder Servicing Fees are accrued daily and paid quarterly, at an annual rate of up to 0.05% of the average daily net assets of the Fund.

Shareholder Servicing Activities shall include one or more of the following: (1) establishing and maintaining accounts and records relating for shareholders of the Fund; (2) aggregating and processing orders involving the shares of the Fund; (3) processing dividend and other distribution payments from the Fund on behalf of shareholders; (4) providing information to shareholders as to their ownership of Fund shares or about other aspects of the operations of the Fund; (5) preparing tax reports or forms on behalf of shareholders; (6) forwarding communications from the Fund to shareholders; (7) assisting shareholders in changing the Fund’s records as to their addresses, dividend options, account registrations or other data; (8) providing sub-accounting with respect to shares beneficially owned by shareholders, or the information to the Fund necessary for sub-accounting; (9) responding to shareholder inquiries relating to the services performed; (10) providing shareholders with a service that invests the assets of their accounts in shares pursuant to specific or pre-authorized instructions; and (11) providing such other similar services as the Adviser may reasonably request to the extent the Service Organization is permitted to do so under applicable statutes, rules or regulations.

As compensation for the Shareholder Servicing Activities, each class pays the Adviser a fee of up to 0.05% of the class’s average daily net assets of the shares owned by investors for which the shareholder servicing agent maintains a servicing relationship.

Any material amendment to the Plan must be approved by the Board, including a majority of the Independent Trustees, or by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes. The Plan may be terminated, with respect to a class or classes of the Fund, without penalty at any time: (1) by vote of a majority of the Board, including a majority of the Independent Trustees; or (2) by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes.

For the fiscal year ended October 31, 2018, the Fund incurred \$1,235 in shareholder servicing related fees.

Portfolio Transactions and Brokerage Allocation

Pursuant to the Advisory Agreement, the Adviser and/or Sub-Adviser determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. Purchases and sales of securities in the OTC market will generally be executed directly with a "market-maker" unless, in the opinion of the Adviser or Sub-Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Fund will be effected through broker-dealers (including banks) that specialize in the types of securities that the Fund will be holding, unless better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser or Sub-Adviser, as applicable, will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser or Sub-Adviser that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other brokerage services in addition to execution services. The Adviser or Sub-Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement or Sub-Advisory Agreement, respectively, with the Fund, to be useful in varying degrees, but of indeterminable value.

It is the Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund. Weight is currently not given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Adviser or Sub-Adviser, even if the specific services are not directly useful to the Fund and may be useful to the Adviser in advising other clients. The Adviser and Sub-Adviser retain the right to update this policy. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser or Sub-Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Fund.

Investment decisions for the Fund may or may not be made independently from those of other client accounts of the Adviser or Sub-Adviser. In certain instances, investment decisions will be made similar to other accounts managed. In the case where the Fund uses similar strategies, applicable procedures will be taken to ensure trading allocations will be handled fairly and abide by all appropriate rules and regulations. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the

same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund. Notwithstanding the above, the Adviser or Sub-Adviser may execute buy and sell orders for accounts and take action in performance of their duties with respect to any of their accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practical, allocate investment opportunities to accounts, including the Fund, over a period of time on a fair and equitable basis and in accordance with applicable law. Whenever possible, all trades are done in a block with allocations made on a pro-rata basis. Each client will participate in the transaction at an average price, allocated in a pro-rata amount based on the asset size of the account.

The Fund is required to identify any securities of its "regular brokers or dealers" that the Fund has acquired during its most recent fiscal year. The Fund is also required to identify any brokerage transactions during its most recent fiscal year that were directed to a broker because of research services provided, along with the amount of any such transaction and any related commissions paid by the Fund.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser or Sub-Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage, research and other services provided to the Fund. In allocating portfolio brokerage, the Adviser or Sub-Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser or Sub-Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund.

For the fiscal year ended October 31 the Fund incurred the following in brokerage commissions:

Fiscal Year Ended	Brokerage Commissions
October 31, 2018	\$210,800
October 31, 2017*	\$69,773

*The Fund commenced operations on June 19, 2017

Portfolio Turnover

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (i) the lesser of purchases or sales of portfolio securities for the fiscal year by (ii) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction costs, could generate capital gains that must be distributed to shareholders as short-term capital gains taxed at ordinary income tax rates (currently as high as 37%) and could increase brokerage commission costs. To the extent that the Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund and may result in a greater number of taxable transactions.

The table below shows the Fund’s portfolio turnover rate as a percentage of the average value of the portfolio during the fiscal year ended October 31:

Fiscal Year Ended	Portfolio Turnover
October 31, 2018	106%
October 31, 2017*	37%

*The Fund commenced operations on June 19, 2017

Code of Ethics

The Fund, the Adviser, the Sub-Adviser, and the Distributor have each adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, personnel of the Adviser, and Distributor to invest in securities that may be purchased or held by the Fund.

Proxy Voting Procedures

The Board has adopted Proxy Voting Policies and Procedures (“Policies”) on behalf of the Trust, which delegate the responsibility for voting proxies of securities held by the Fund to the Adviser and responsibility for voting proxies of securities held by the Fund to the Adviser, subject to the Board’s continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Fund and its shareholders. The Policies also require the Adviser to present to the Board, at least annually, the Adviser’s Proxy Policies and a record of each proxy voted by the Adviser on behalf of the Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest. Notwithstanding this delegation of responsibilities, however, the Fund retains the right to vote proxies relating to its portfolio securities. A copy of the Adviser’s Proxy Voting Policies is attached hereto as Appendix B.

More Information. The actual voting records relating to portfolio securities during the 12-month period ended June 30 will be available without charge, upon request, by calling toll-free, 1-800-SEC-0330 or by accessing the SEC’s website at www.sec.gov.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). To ensure compliance with this law, the Trust’s Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust’s CCO serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund’s Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to “freeze” the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

Portfolio Holdings Information

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

The Fund discloses its portfolio holdings by mailing the annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. In addition, the Fund discloses its portfolio holdings reports on Forms N-CSR and Form N-Q two months after the end of each quarter/semi-annual period.

The Funds may choose to make portfolio holdings information available to rating agencies such as Lipper, Morningstar or Bloomberg earlier and more frequently on a confidential basis.

Under limited circumstances, as described below, the Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the Securities and Exchange Commission on Form N-CSR or Form N-Q. In each case, a determination has been made that such advance disclosure is supported by a legitimate business purpose and that the recipient is subject to a duty to keep the information confidential.

The Adviser and Sub-Adviser. Personnel of the Adviser and Sub-Adviser, including personnel responsible for managing the Fund's portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for the Adviser or Sub-Adviser to provide their management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of portfolio managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

Gemini Fund Services, LLC. Gemini Fund Services, LLC is the transfer agent, fund accountant and administrator for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Northern Lights Compliance Services, LLC. Northern Lights Compliance Services, LLC provides consulting services to the Funds as well as related compliance services; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

U.S. Bank, National Association. U.S. Bank, National Association is custodian for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Tait, Weller & Baker LLP. Tait, Weller & Baker LLP is the Fund's independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Fund's annual financial statements and providing assistance and consultation in connection with SEC filings.

Alston & Bird, LLP. Alston & Bird, LLP is counsel to the Trust; therefore, its personnel have access to the Fund's portfolio holdings in connection with review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Blank Rome, LLP. Blank Rome, LLP is counsel to the Independent Trustees.

Additions to List of Approved Recipients

The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Fund's portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Fund, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

Compliance With Portfolio Holdings Disclosure Procedures

The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

Determination of Net Asset Value

As indicated in the Prospectus under the heading "Net Asset Value," the net asset value ("NAV") of the Fund's shares, by class, is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund, by class.

Generally, the Fund's domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Fund's fair value committee in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other

securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board.

Under certain circumstances, the Fund may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by the Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Fund's calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Fund's fair value committee in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Fund's NAV by short-term traders. In addition, because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange is closed and an investor is not able to purchase, redeem or exchange shares.

Fund shares are valued at the close of regular trading on the New York Stock Exchange (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the New York Stock Exchange is open. For purposes of calculating the NAV, the Fund normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, the Fund may value securities at fair value or estimate their value as determined in good faith by the Board or its designees, pursuant to procedures

approved by the Board. Fair valuation may also be used by the Board if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

The Fund may hold securities, such as private placements, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued at their fair market value as determined using the “fair value” procedures approved by the Board. The Board has delegated execution of these procedures to a fair value team composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) adviser and/or sub-adviser. The team may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

Fair Value Committee and Valuation Process. The fair value committee is composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) adviser and/or sub-adviser. The applicable investments are valued collectively via inputs from each of these groups. For example, fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source), (ii) securities for which, in the judgment of the adviser or sub-adviser, the prices or values available do not represent the fair value of the instrument. Factors which may cause the adviser or sub-adviser to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; (iv) securities with respect to which an event that will affect the value thereof has occurred (a “significant event”) since the closing prices were established on the principal exchange on which they are traded, but prior to the Fund’s calculation of its net asset value. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private placements or non-traded securities are valued via inputs from the adviser or sub-adviser valuation based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If the adviser or sub-adviser is unable to obtain a current bid from such independent dealers or other independent parties, the fair value team shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Fund’s holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Standards For Fair Value Determinations. As a general principle, the fair value of a security is the amount that the Fund might reasonably expect to realize upon its current sale. The Trust has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures (“ASC 820”). In accordance with ASC 820, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the

assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available under the circumstances.

Various inputs are used in determining the value of the Fund's investments relating to ASC 820. These inputs are summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The fair value team takes into account the relevant factors and surrounding circumstances, which may include: (i) the nature and pricing history (if any) of the security; (ii) whether any dealer quotations for the security are available; (iii) possible valuation methodologies that could be used to determine the fair value of the security; (iv) the recommendation of a portfolio manager of the Fund with respect to the valuation of the security; (v) whether the same or similar securities are held by other funds managed by the Adviser (or sub-adviser) or other funds and the method used to price the security in those funds; (vi) the extent to which the fair value to be determined for the security will result from the use of data or formulae produced by independent third parties and (vii) the liquidity or illiquidity of the market for the security.

Board of Trustees Determination. The Board of Trustees meets at least quarterly to consider the valuations provided by the fair value committee and to ratify the valuations made for the applicable securities. The Board of Trustees considers the reports provided by the fair value committee, including follow up studies of subsequent market-provided prices when available, in reviewing and determining in good faith the fair value of the applicable portfolio securities.

The Trust expects that the holidays upon which the Exchange will be closed are as follows: New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Purchase of Shares

Orders for shares received by the Fund in good order prior to the close of business on the NYSE on each day during such periods that the NYSE is open for trading are priced at NAV per share computed as of the close of the regular session of trading on the NYSE. Orders received in good order after the close of the NYSE, or on a day it is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined NAV or offering price per share.

Redemption of Shares

The Fund will redeem all or any portion of a shareholder's shares in the Fund when requested in accordance with the procedures set forth in the "Redemptions" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

- (a) when the NYSE is closed, other than customary weekend and holiday closings;
- (b) when trading on that exchange is restricted for any reason;

- (c) when an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or
- (d) when the SEC by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

The Fund may purchase shares of certain series which charge a redemption fee to shareholders (such as the Fund) that redeem shares of the underlying fund within a certain period of time (such as one year). The fee is payable to the underlying fund. Accordingly, if the Fund were to invest in an underlying fund and incur a redemption fee as a result of redeeming shares in such underlying fund, the Fund would bear such redemption fee. The Fund will not, however, invest in shares of an underlying fund that is sold with a contingent deferred sales load.

Supporting documents in addition to those listed under “Redemptions” in the Prospectus will be required from executors, administrators, Trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, Trust instruments, certificates of death, appointments as executor, certificates of corporate authority and waiver of tax required in some states when settling estates.

Under section 72.1021(a) of the Texas Property Code, initial investors in the Fund who are Texas residents may designate a representative to receive notices of abandoned property in connection with Fund shares. Texas shareholders who wish to appoint a representative should notify the Trust’s Transfer Agent by writing to the address below to obtain a form for providing written notice to the Trust:

Balter Invenomic Fund
c/o Gemini Fund Services, LLC
17645 Wright Street, Suite 200
Omaha, Nebraska 68130

Tax Status

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. The tax considerations relevant to a specific shareholder depend upon its specific circumstances, and the following general summary does not attempt to discuss all potential tax considerations that could be relevant to a prospective shareholder with respect to the Fund or its investments. This general summary is based on the Internal Revenue Code of 1986, as amended (the “Code”), the Federal Income Tax Regulations promulgated thereunder, and administrative and judicial interpretations thereof as of the date hereof, all of which are subject to change (potentially on a retroactive basis).

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Code. All shareholders should consult a qualified tax advisor regarding their investment in the Fund.

The Fund has qualified and intends to continue to qualify and has elected to be treated as a regulated investment company under Subchapter M of the Code, which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing

of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Fund will be computed in accordance with Section 852 of the Code. The Internal Revenue Service (“IRS”) issued a number of private letter rulings to other mutual funds (unrelated to the Fund), indicating that certain income from a fund’s investment in a wholly-owned foreign subsidiary constituted “qualifying income” for purposes of Subchapter M. However, the IRS suspended issuance of these letter rulings in 2011 pending a review of its position, and in 2016 declared that it would no longer issue private letter rulings on this issue. If the IRS were to change its position in published public guidance with respect to the conclusions reached in these private letter rulings (which change in position might be applied to the Fund retroactively), the income from the Fund’s investment in the Subsidiary might not be qualifying income, and the Fund might not therefore qualify as a regulated investment company for one or more years.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of the Fund. Under the Regulated Investment Company Act of 2010, the Fund will be permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. However, losses incurred during those future years will be required to be utilized prior to the losses incurred in pre-enactment tax years. Thus, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law.

The Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such stock, securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund’s assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund’s assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M of the Code in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund’s net investment income or net realized capital gains in their individual capacities. Distributions

to shareholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time its distributions so as to avoid liability for this excise tax.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income. In most cases the Fund will hold shares in Underlying Pools for less than 12 months, such that its sales of such shares from time to time will not qualify as long-term capital gains for those investors who hold shares of the Fund in taxable accounts.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as short-term capital gain; regardless of the length of time the shares of the Trust have been held by such shareholders.

A redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to reinvest distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax (currently at a rate of 24%) in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable

interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Fund in certain "passive foreign investment companies" ("PFICs") could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether it receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to its shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income, which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal

daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

In addition, the 2017 Tax Cuts and Jobs Act requires that taxpayers, such as the Fund, that use an accrual method of accounting for U.S. federal income tax purposes are generally required to include certain amounts in income no later than the time such amounts are reflected on such taxpayer's applicable financial statements. Certain fees treated as OID may be included as income for financial statement purposes when received (as opposed to being accrued into income over the term of the debt instrument), which may thus require such amounts be treated as taxable income of the Fund upon their receipt.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If the Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisors about the application of federal, state and local and foreign tax law in light of their particular situation.

Financial Statements

The financial statements of the Fund for the fiscal year ended October 31, 2018 and the independent registered public accounting firm's report are incorporated herein by reference to the Fund's Annual Report. These financial statements include the schedule of investments, statement of assets and liabilities, statement of operations, statements of changes in net assets, financial highlights and notes to the financial statements. The Fund will provide the Fund's Annual Report without charge upon request in writing or by calling the Fund at 1-844-322-8112.

APPENDIX “A” RATINGS DEFINITIONS

Standard & Poor’s Issue Credit Rating Definitions

A Standard & Poor’s issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects Standard & Poor’s view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long term or short term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days—including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term rating addresses the put feature, in addition to the usual long-term rating. Medium-term notes are assigned long-term ratings.

Short-Term Issue Credit Ratings

A-1

A short-term obligation rated ‘A-1’ is rated in the highest category by Standard & Poor’s. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated ‘B’ is regarded as having significant speculative characteristics. Ratings of ‘B-1’, ‘B-2’, and ‘B-3’ may be assigned to indicate finer distinctions within the ‘B’ category. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

B-1

A short-term obligation rated 'B-1' is regarded as having significant speculative characteristics, but the obligor has a relatively stronger capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-2

A short-term obligation rated 'B-2' is regarded as having significant speculative characteristics, and the obligor has an average speculative-grade capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-3

A short-term obligation rated 'B-3' is regarded as having significant speculative characteristics, and the obligor has a relatively weaker capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

C

A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation, including a regulatory capital instrument, are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

SPUR (Standard & Poor's Underlying Rating)

This is a rating of a stand-alone capacity of an issue to pay debt service on a credit-enhanced debt issue, without giving effect to the enhancement that applies to it. These ratings are published only at the request of the debt issuer/obligor with the designation SPUR to distinguish them from the credit-enhanced rating that applies to the debt issue. Standard & Poor's maintains surveillance of an issue with a published SPUR.

Dual Ratings

Standard & Poor's assigns "dual" ratings to all debt issues that have a put option or demand feature as part of their structure. The first rating addresses the likelihood of repayment of principal and interest as due, and the second rating addresses only the demand feature. The long-term rating symbols are used for bonds to denote the long-term maturity and the short-term rating symbols for the put option (for example, 'AAA/A-1+'). With U.S. municipal short-term demand debt, note rating symbols are used with the short-term issue credit rating symbols (for example, 'SP-1+/A-1+').

The ratings and other credit related opinions of Standard & Poor's and its affiliates are statements of opinion as of the date they are expressed and not statements of fact or recommendations to purchase, hold, or sell any securities or make any investment decisions. Standard & Poor's assumes no obligation to update any information following publication. Users of ratings and credit related opinions should not rely on them in making any investment decision. Standard & Poor's opinions and analyses do not address the suitability of any security. Standard & Poor's Financial Services LLC does not act as a fiduciary or an investment advisor. While Standard & Poor's has obtained information from sources it believes to be reliable, Standard & Poor's does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Ratings and credit related opinions may be changed, suspended, or withdrawn at any time.

Active Qualifiers (Currently applied and/or outstanding)

i

This subscript is used for issues in which the credit factors, terms, or both, that determine the likelihood of receipt of payment of interest are different from the credit factors, terms or both that determine the likelihood of receipt of principal on the obligation. The ‘i’ subscript indicates that the rating addresses the interest portion of the obligation only. The ‘i’ subscript will always be used in conjunction with the ‘p’ subscript, which addresses likelihood of receipt of principal. For example, a rated obligation could be assigned ratings of “AAA_p NR_i” indicating that the principal portion is rated “AAA” and the interest portion of the obligation is not rated.

L

Ratings qualified with ‘L’ apply only to amounts invested up to federal deposit insurance limits.

p

This subscript is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The ‘p’ subscript indicates that the rating addresses the principal portion of the obligation only. The ‘p’ subscript will always be used in conjunction with the ‘i’ subscript, which addresses likelihood of receipt of interest. For example, a rated obligation could be assigned ratings of “AAA_p NR_i” indicating that the principal portion is rated “AAA” and the interest portion of the obligation is not rated.

pi

Ratings with a ‘pi’ subscript are based on an analysis of an issuer’s published financial information, as well as additional information in the public domain. They do not, however, reflect in-depth meetings with an issuer’s management and therefore may be based on less comprehensive information than ratings without a ‘pi’ subscript. Ratings with a ‘pi’ subscript are reviewed annually based on a new year’s financial statements, but may be reviewed on an interim basis if a major event occurs that may affect the issuer’s credit quality.

pr

The letters ‘pr’ indicate that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

preliminary

Preliminary ratings are assigned to issues, including financial programs, in the following circumstances.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions. Assignment of a final rating is conditional on the receipt and approval by Standard & Poor’s of appropriate documentation. Changes in the information provided to Standard & Poor’s could result in the assignment of a different rating. In addition, Standard & Poor’s reserves the right not to issue a final rating.
- Preliminary ratings are assigned to Rule 415 Shelf Registrations. As specific issues, with defined terms, are offered from the master registration, a final rating may be assigned to them in accordance with Standard & Poor’s policies. The final rating may differ from the preliminary rating.

t

This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

unsolicited

Unsolicited ratings are those credit ratings assigned at the initiative of Standard & Poor's and not at the request of the issuer or its agents.

Inactive Qualifiers (No longer applied or outstanding)

This symbol indicated continuance of the ratings is contingent upon Standard & Poor's receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

c

This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment-grade level and/or the issuer's bonds are deemed taxable. Discontinued use in January 2001.

q

A 'q' subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

r

The 'r' modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an 'r' modifier should not be taken as an indication that an obligation will not exhibit extraordinary non-credit related risks. Standard & Poor's discontinued the use of the 'r' modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Local Currency and Foreign Currency Risks

Country risk considerations are a standard part of Standard & Poor's analysis for credit ratings on any issuer or issue. Currency of repayment is a key factor in this analysis. An obligor's capacity to repay foreign currency obligations may be lower than its capacity to repay obligations in its local currency due to the sovereign government's own relatively lower capacity to repay external versus domestic debt. These sovereign risk considerations are incorporated in the debt ratings assigned to specific issues. Foreign currency issuer ratings are also distinguished from local currency issuer ratings to identify those instances where sovereign risks make them different for the same issuer.

Moody's Credit Rating Definitions

Purpose

The system of rating securities was originated by John Moody in 1909. The purpose of Moody's ratings is to provide investors with a simple system of gradation by which relative creditworthiness of securities may be noted.

Rating Symbols

Gradations of creditworthiness are indicated by rating symbols, with each symbol representing a group in which the credit characteristics are broadly the same. There are nine symbols as shown below, from that used to designate least credit risk to that denoting greatest credit risk:

Aaa Aa A Baa Ba B Caa Ca C

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa.

Absence of a Rating

Where no rating has been assigned or where a rating has been withdrawn, it may be for reasons unrelated to the creditworthiness of the issue.

Should no rating be assigned, the reason may be one of the following:

1. An application was not received or accepted.
2. The issue or issuer belongs to a group of securities or entities that are not rated as a matter of policy.
3. There is a lack of essential data pertaining to the issue or issuer.
4. The issue was privately placed, in which case the rating is not published in Moody's publications.

Withdrawal may occur if new and material circumstances arise, the effects of which preclude satisfactory analysis; if there is no longer available reasonable up-to-date data to permit a judgment to be formed; if a bond is called for redemption; or for other reasons.

Changes in Rating

The credit quality of most issuers and their obligations is not fixed and steady over a period of time, but tends to undergo change. For this reason changes in ratings occur so as to reflect variations in the intrinsic relative position of issuers and their obligations.

A change in rating may thus occur at any time in the case of an individual issue. Such rating change should serve notice that Moody's observes some alteration in creditworthiness, or that the previous rating did not fully reflect the quality of the bond as now seen. While because of their very nature, changes are to be expected more frequently among bonds of lower ratings than among bonds of higher ratings. Nevertheless, the user of bond ratings should keep close and constant check on all ratings — both high and low — to be able to note promptly any signs of change in status that may occur.

Limitations to Uses of Ratings*

Obligations carrying the same rating are not claimed to be of absolutely equal credit quality. In a broad sense, they are alike in position, but since there are a limited number of rating classes used in grading thousands of bonds, the symbols cannot reflect the same shadings of risk which actually exist.

As ratings are designed exclusively for the purpose of grading obligations according to their credit quality, they should not be used alone as a basis for investment operations. For example, they have no value in forecasting the direction of future trends of market price. Market price movements in bonds are influenced not only by the credit quality of individual issues but also by changes in money rates and general economic trends, as well as by the length of maturity, etc. During its life even the highest rated bond may have wide price movements, while its high rating status remains unchanged.

The matter of market price has no bearing whatsoever on the determination of ratings, which are not to be construed as recommendations with respect to “attractiveness”. The attractiveness of a given bond may depend on its yield, its maturity date or other factors for which the investor may search, as well as on its credit quality, the only characteristic to which the rating refers.

Since ratings involve judgments about the future, on the one hand, and since they are used by investors as a means of protection, on the other, the effort is made when assigning ratings to look at “worst” possibilities in the “visible” future, rather than solely at the past record and the status of the present. Therefore, investors using the rating should not expect to find in them a reflection of statistical factors alone, since they are an appraisal of long-term risks, including the recognition of many non-statistical factors.

Though ratings may be used by the banking authorities to classify bonds in their bank examination procedure, Moody’s ratings are not made with these bank regulations in mind. Moody’s Investors Service’s own judgment as to the desirability or non-desirability of a bond for bank investment purposes is not indicated by Moody’s ratings.

Moody’s ratings represent the opinion of Moody’s Investors Service as to the relative creditworthiness of securities. As such, they should be used in conjunction with the descriptions and statistics appearing in Moody’s publications. Reference should be made to these statements for information regarding the issuer. Moody’s ratings are not commercial credit ratings. In no case is default or receivership to be imputed unless expressly stated.

*As set forth more fully on the copyright, credit ratings are, and must be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities. Each rating or other opinion must be weighed solely as one factor in any investment decision made by or on behalf of any user of the information, and each such user must accordingly make its own study and evaluation of each security and of each issuer and guarantor of, and each provider of credit support for, each security that it may consider purchasing, selling or holding.

Short-Term Ratings

Moody’s short-term ratings are opinions of the ability of issuers to honor short-term financial obligations. Ratings may be assigned to issuers, short-term programs or to individual short-term debt instruments. Such obligations generally have an original maturity not exceeding thirteen months, unless explicitly noted.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

P-1

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP

Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Note: Canadian issuers rated P-1 or P-2 have their short-term ratings enhanced by the senior-most long-term rating of the issuer, its guarantor or support-provider.

Short-term vs. Long-term Ratings

Long Term	Short Term
Investment Grade Aaa Aa1 Aa2 Aa3 A1 A2 A3 Baa1 Baa2 Baa3	Prime-1 Prime-2 Prime-3
Speculative Grade Ba1 Ba2 Ba3 B1 B2 B3 Caa1 Caa2 Caa3 Ca C	Not Prime

Fitch's National Credit Ratings

For those countries in which foreign and local currency sovereign ratings are below 'AAA', and where there is demand for such ratings, Fitch Ratings will provide National Ratings. It is important to note that each National Rating scale is unique and is defined to serve the needs of the local market in question.

The National Rating scale provides a relative measure of creditworthiness for rated entities only within the country concerned. Under this rating scale, a 'AAA' Long-Term National Rating will be assigned to the lowest relative risk within that country, which, in most but not all cases, will be the sovereign state.

The National Rating scale merely ranks the degree of perceived risk relative to the lowest default risk in that same country. Like local currency ratings, National Ratings exclude the effects of sovereign and transfer risk and exclude the possibility that investors may be unable to repatriate any due interest and principal repayments. It is not related to the rating scale of any other national market. Comparisons between different national scales or between an individual national scale and the international rating scale are therefore inappropriate and potentially misleading. Consequently they are identified by the addition of a special identifier for the country concerned, such as 'AAA(arg)' for National Ratings in Argentina.

In certain countries, regulators have established credit rating scales, to be used within their domestic markets, using specific nomenclature. In these countries, the agency's National Short-Term Rating definitions for 'F1+(xxx)', 'F1(xxx)', 'F2(xxx)' and 'F3(xxx)' may be substituted by the regulatory scales, e.g. 'A1+', 'A1', 'A2' and 'A3'. The below definitions thus serve as a template, but users should consult the individual scales for each country listed on the agency's web-site to determine if any additional or alternative category definitions apply.

National Short-Term Credit Ratings

F1(xxx)

Indicates the strongest capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Under the agency's National Rating scale, this rating is assigned to the lowest default risk relative to others in the same country. Where the liquidity profile is particularly strong, a "+" is added to the assigned rating.

F2(xxx)

Indicates a good capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. However, the margin of safety is not as great as in the case of the higher ratings.

F3(xxx)

Indicates an adequate capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. However, such capacity is more susceptible to near-term adverse changes than for financial commitments in higher rated categories.

B(xxx)

Indicates an uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Such capacity is highly susceptible to near-term adverse changes in financial and economic conditions.

C(xxx)

Indicates a highly uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D(xxx)

Indicates actual or imminent payment default.

Notes to Long-Term and Short-Term National Ratings:

The ISO country code suffix is placed in parentheses immediately following the rating letters to indicate the identity of the National market within which the rating applies. For illustrative purposes, (xxx) has been used.

“+” or “-” may be appended to a National Rating to denote relative status within a major rating category. Such suffixes are not added to the ‘AAA(xxx)’ Long-Term National Rating category, to categories below ‘CCC(xxx)’, or to Short-Term National Ratings other than ‘F1(xxx)’.

LONG-TERM RATINGS

Standard & Poor's Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on Standard & Poor's analysis of the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation;
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A 'C' rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the 'C' rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation, including a regulatory capital instrument, are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action if payments on an obligation are jeopardized. An obligation's rating is lowered to 'D' upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

Plus (+) or minus (-)

The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR

This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

See active and inactive qualifiers following Standard & Poor's Short-Term Issue Credit Ratings beginning on page A-3.

Moody's Long-Term Debt Ratings

Long-Term Obligation Ratings

Moody's long-term obligation ratings are opinions of the relative credit risk of fixed-income obligations with an original maturity of one year or more. They address the possibility that a financial obligation will not be honored as promised. Such ratings reflect both the likelihood of default and any financial loss suffered in the event of default.

Moody's Long-Term Rating Definitions:

Aaa

Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa

Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A

Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa

Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.

Ba

Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B

Obligations rated B are considered speculative and are subject to high credit risk.

Caa

Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca

Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C

Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Fitch's National Long-Term Credit Ratings

AAA(xxx)

'AAA' National Ratings denote the highest rating assigned by the agency in its National Rating scale for that country. This rating is assigned to issuers or obligations with the lowest expectation of default risk relative to all other issuers or obligations in the same country.

AA(xxx)

'AA' National Ratings denote expectations of very low default risk relative to other issuers or obligations in the same country. The default risk inherent differs only slightly from that of the country's highest rated issuers or obligations.

A(xxx)

'A' National Ratings denote expectations of low default risk relative to other issuers or obligations in the same country. However, changes in circumstances or economic conditions may affect the capacity for timely repayment to a greater degree than is the case for financial commitments denoted by a higher rated category.

BBB(xxx)

'BBB' National Ratings denote a moderate default risk relative to other issuers or obligations in the same country. However, changes in circumstances or economic conditions are more likely to affect the capacity for timely repayment than is the case for financial commitments denoted by a higher rated category.

BB(xxx)

'BB' National Ratings denote an elevated default risk relative to other issuers or obligations in the same country. Within the context of the country, payment is uncertain to some degree and capacity for timely repayment remains more vulnerable to adverse economic change over time.

B(xxx)

'B' National Ratings denote a significantly elevated default risk relative to other issuers or obligations in the same country. Financial commitments are currently being met but a limited margin of safety remains and capacity for continued timely payments is contingent upon a sustained, favorable business and economic environment. For individual obligations, may indicate distressed or defaulted obligations with potential for extremely high recoveries.

CCC(xxx)

'CCC' National Ratings denote that default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic conditions.

CC(xxx)

'CC' National Ratings denote that default of some kind appears probable.

C(xxx)

'C' National Ratings denote that default is imminent.

D(xxx)

'D' National Ratings denote an issuer or instrument that is currently in default.

Notes to Long-Term and Short-Term National Ratings:

The ISO country code suffix is placed in parentheses immediately following the rating letters to indicate the identity of the National market within which the rating applies. For illustrative purposes, (xxx) has been used.

“+” or “-” may be appended to a National Rating to denote relative status within a major rating category. Such suffixes are not added to the ‘AAA(xxx)’ Long-Term National Rating category, to categories below ‘CCC(xxx)’, or to Short-Term National Ratings other than ‘F1(xxx)’.

MUNICIPAL NOTE RATINGS**Standard & Poor’s Municipal Short-Term Note Ratings Definitions**

A Standard & Poor’s U.S. municipal note rating reflects Standard & Poor’s opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, Standard & Poor’s analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

See active and inactive qualifiers following Standard & Poor’s Short-Term Issue Credit Ratings beginning on page A-3.

Moody’s US Municipal Short-Term Debt And Demand Obligation Ratings**Short-Term Debt Ratings**

There are three rating categories for short-term municipal obligations that are considered investment grade. These ratings are designated as Municipal Investment Grade (MIG) and are divided into three levels -- MIG 1 through MIG 3. In addition, those short-term obligations that are of speculative quality are designated SG, or speculative grade. MIG ratings expire at the maturity of the obligation.

MIG 1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned; a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of the degree of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of the degree of risk associated with the ability to receive purchase price upon demand ("demand feature"), using a variation of the MIG rating scale, the Variable Municipal Investment Grade or VMIG rating.

When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

VMIG rating expirations are a function of each issue's specific structural or credit features.

VMIG 1

This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2

This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3

This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG

This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

APPENDIX “B”

Proxy Voting Policy

The following information is a summary of the proxy voting guidelines for BALTER LIQUID ALTERNATIVES, LLC (the “Adviser”). Throughout this policy, **Invenomic Capital Management, LP is known as the “Subadviser”**.

I. BACKGROUND

In accordance with Rule 206(4)-6 under the Investment Advisers Act of 1940 (the “Advisers Act”), each registered investment adviser should adopt and implement written policies and procedures reasonably designed to ensure that it is voting proxies in the best interest of its clients, describe how material conflicts that arise between the investment adviser and clients are resolved, disclose how clients may obtain information on how the investment adviser voted proxies, and describe its proxy voting procedures and furnish a copy upon request. Furthermore, Rule 204-2 requires certain books and records related to proxy voting to be maintained by the investment adviser.

II. PROXY VOTING POLICY AND PROCEDURES

Adopted November 17, 2015

A. STATEMENT OF POLICY

The Adviser shall retain full discretionary authority to exercise voting rights with respect to the securities and other investments of the Subadviser Assets. The Adviser, including without limitation its designee, shall have the power to vote, either in person or by proxy, all securities in which the Subadviser Assets may be invested from time to time, and shall not be required to seek or take instructions from the Subadviser or take any action with respect thereto. The Subadviser may provide input to the proxy vote process not later than 5 days prior to the proxy vote deadline. The Adviser will establish a written procedure for proxy voting in compliance with current applicable rules and regulations, including but not limited to Rule 30b1-4 under the 1940 Act. The Adviser or its designee will provide a copy of such procedure to the Subadviser and establish a process for the timely distribution of the voting record with respect to the Fund’s securities and other information necessary for the Fund to complete information required by Form N-1A under the 1940 Act and the Securities Act of 1933, as amended (the “Securities Act”), Form N-PX under the 1940 Act, and Form N-CSR under the Sarbanes-Oxley Act of 2002, as amended, respectively.

B. PROXY VOTING PROCEDURES

The Advisor will retain a third party proxy advisory firm to provide proxy voting recommendations and to assist it in coordinating and voting proxies with respect to client securities. On an annual basis, the Chief Compliance Officer will review the services of the proxy advisory firm to assure that:

- proxies are being properly voted;
- appropriate records are being retained;
- the proxy advisory firm’s conflict policies and procedures are robust; and
- there have been no business changes at the proxy advisory firm that would endanger the capacity or competency of the proxy advisory firm to provider the advisor with recommendations.

If there are any client securities for which the Advisor is unable to provide a voting recommendation or assist in voting proxies, the Chief Investment Officer with the assistance of the Chief Compliance Officer, will:

- keep a record of each proxy received and how voted;
- determine which accounts managed by the Advisor hold the security to which the proxy relates; and
- absent conflicts of interest (see Section D below), determine how the Advisor should vote the proxy and in a timely manner vote the proxy by mail or electronic means.

Within 10 days of the proxy vote deadline, the Advisor will notify the Subadviser of any upcoming proposals. The Subadviser may provide input to the proxy vote process not later than 5 days prior to the proxy vote deadline by email to the Chief Compliance Officer, or his designee.

The Chief Compliance Officer will have the responsibility of ensuring that the Advisor complies with the Proxy Voting Policies and Procedures.

C. VOTING GUIDELINES

The Advisor believes that voting proxies in accordance with the following guidelines is in the best interests of its clients. After consideration of input from any Subadviser and review of the proxy advisory firm's vote recommendation, the Advisor will:

- generally vote in accordance with the recommendation of the third party proxy advisory firm;
- generally, in the absence of a recommendation from the third party proxy service, vote in favor of routine corporate housekeeping proposals, including election of directors, selection of auditors, and increases in or reclassification of common stock. The Advisor will generally vote for stock option plans or plan amendments for corporate directors, executive and employees; and
- generally, in the absence of a recommendation from the third party proxy service, vote against proposals that make it more difficult to replace members of the issuer's board of directors, including proposals to stagger the board, cause management to be overrepresented on the board, introduce cumulative voting, introduce unequal voting rights, and create supermajority voting.

For other proposals, the Advisor shall determine whether a proposal is in the best interests of its clients and may take into account the following factors, among others:

- whether the proposal was recommended by management, the Subadviser's opinion of management, and the Advisor's opinion of management;
- whether the proposal acts to entrench existing management; and
- whether the proposal fairly compensates management for past and future performance.

D. CONFLICTS OF INTEREST

The Advisor may occasionally be subject to conflicts of interest in the voting of proxies due to business or personal relationships it maintains with persons having an interest in the outcome of certain votes. The Advisor, its affiliates and/or its employees may also occasionally have business or personal relationships with the proponents of proxy proposals, participants in proxy contests, corporate directors and officers, or candidates for directorships. If at any time, the Chief Compliance Officer becomes aware of potential or actual conflict of interest relating to a particular proxy proposal, the Chief Compliance Officer will cause the Advisor to handle the proposal as follows:

- If the proposal is covered by the proxy advisory firm, the Chief Compliance Officer will cause the proxy to be voted in accordance with the proxy advisory firm's recommendation; or
- If the proposal is not covered by the proxy advisory firm, the Chief Compliance Officer will notify the Northern Lights Fund Trust II Chief Compliance Officer who shall determine the manner in which to vote and may notify the Fund's Board of Trustees or its designated committee.

In the case of conflicts involving any advisory client of Balter Client Management, LLC ("BCM"), an entity that controls the Advisor, the proposal will be thoroughly reviewed by BCM on behalf of these clients and voted in the best interests of these clients or, in the discretion of BCM, will not be voted by BCM.

E. DISCLOSURE

Information regarding how the fund, a series of Northern Lights Fund Trust II, voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge by calling 1-844-322-8112 or by accessing the SEC's website at <http://www.sec.gov>.

F. RECORDKEEPING

The Chief Compliance Officer will maintain files relating to the Advisor's proxy voting procedures in an easily accessible place. Records will be maintained and preserved for five years from the end of the fiscal year during which the last entry was made on a record. Records of the following will be included in the files:

- Copies of this proxy voting policy and procedures, and any amendments thereto.
- A copy of each proxy statement that Advisor receives that are not available on the SEC's EDGAR system.
- A record of each vote that Advisor casts.
- A copy of any document Advisor created that was material to making a decision how to vote proxies, or that memorializes that decision.

A copy of each written client request for information on how the Advisor voted such client's proxies, and a copy of any written response to any (written or oral) client request for information on how the Advisor voted its proxies.
